PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained **Python** scripts for automating data ingestion and scheduled reporting tasks, reducing manual effort by approximately **40%**.
- Managed production support for enterprise **Java** applications, responding to P1/P2 incidents and ensuring adherence to strict SLAs using **Splunk** and **Dynatrace**.
- Designed and implemented **REST APIs** using **Java Spring Boot** for cross-service communication, enhancing system integration capabilities.
- Applied engineering principles to troubleshoot and resolve complex issues within distributed systems running on **AWS** infrastructure, minimizing customer impact.
- Created and deployed automated runbooks and alerts using **Python** and **Bash** scripting to proactively manage system health and performance on **Linux** environments.
- Engineered and optimized **SQL** queries and database schemas for PostgreSQL and MySQL, supporting critical data validation and ETL processes.
- Participated in on-call rotations, ensuring the availability and reliability of cloud-based applications by responding to critical alerts and performing root cause analysis.

SKILLS

Languages – Python, Java, SQL, Bash, R

Frameworks/Libraries – Spring Boot, pandas, NumPy, scikit-learn

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Containerization & Orchestration – Docker, Kubernetes

CI/CD & Version Control – Jenkins, Git

Monitoring & Observability – Splunk, Dynatrace, CloudWatch

Databases – PostgreSQL, MySQL, Oracle

PROJECTS

Automated Incident Response System

- Developed a **Python**-based system to automatically ingest alerts from **Splunk** and **CloudWatch**, correlating events to reduce manual triage time for critical incidents.
- Implemented automated diagnostic scripts that collected logs and system metrics from **Linux** servers, attaching them to Jira tickets for faster root cause analysis.
- Configured the system to trigger automated remediation actions for common P1/P2 issues, improving system recovery speed by an estimated **30%**.

Cloud Infrastructure Monitoring and Alerting

- Built custom dashboards in **AWS CloudWatch** to visualize key performance indicators for EC2 instances and Lambda functions, providing real-time operational visibility.
- Designed and implemented a **Terraform** module to provision consistent monitoring and alerting infrastructure across multiple AWS environments.
- Wrote **Python** scripts to validate alert configurations against defined SLOs, ensuring that monitoring coverage remained accurate and effective.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
