HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed, deployed, and administered **Oracle GoldenGate Microservices** for enterprise data replication, ensuring high availability and fault tolerance.
- Implemented and supported **Change Data Capture (CDC)** and data streaming solutions, enabling real-time data synchronization across diverse platforms.
- Developed and deployed cloud-native data replication infrastructure on **AWS** and **Azure**, adhering to security best practices and performance targets.
- Built and maintained **Infrastructure as Code (IaC)** using **Terraform/OpenTofu** to automate the provisioning and management of cloud resources, reducing manual deployment errors by approximately 45%.
- Enhanced and supported **CI/CD pipelines** for automated deployment of data platform components, improving deployment frequency by 30% and reducing lead time.
- Collaborated with architects, engineers, and business stakeholders to gather requirements and deliver scalable, resilient data replication solutions that aligned with strategic business objectives.
- Containerized data replication services using **Docker** and managed deployments on **Kubernetes**, ensuring consistent environments and efficient resource utilization.

SKILLS

Data Movement Technologies – Change Data Capture (CDC), Data Streaming, Oracle GoldenGate Microservices, Data Replication

Cloud Platforms – AWS, Azure

Infrastructure as Code – Terraform, OpenTofu

DevOps & CI/CD – Jenkins, Git, Docker, Kubernetes

Databases & Data Handling – Oracle, PostgreSQL, SQL

Programming & Scripting – Python, Java

Core Engineering – Troubleshooting, Stakeholder Management, Agile Methodologies

PROJECTS

Cloud Data Replication Platform on AWS

- Engineered a scalable data replication solution on **AWS** using **Oracle GoldenGate Microservices** and managed services like **EC2** and **S3**.
- Automated infrastructure provisioning and configuration management using **Terraform**, enabling repeatable and reliable deployments across multiple environments.
- Integrated the platform with existing enterprise data pipelines, facilitating near real-time data movement for critical business reporting.

Automated Data Streaming Pipeline with Python

- Developed Python scripts to automate data extraction and streaming from various sources, supporting **Change Data Capture (CDC)** workflows.
- Configured and deployed data streaming agents on **Linux** servers, ensuring efficient data flow and minimal latency for downstream consumption.
- Implemented basic monitoring and alerting for the pipeline using **CloudWatch**, capturing key performance indicators and error rates.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
