HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and developed **Java Spring Boot** microservices for backend features, implementing RESTful APIs and ensuring secure data exchange.
- Engineered **Python scripts** to automate ETL processes and generate scheduled reports, improving data processing efficiency by **15%**.
- Managed production support for enterprise applications using **Splunk** and **Dynatrace**, responding to P1/P2 incidents and maintaining SLA targets.
- Collaborated with cross-functional teams to deliver high-quality solutions, contributing to technical design discussions and influencing implementation decisions.
- Supported and improved services operating in a **24/7 production environment**, performing monitoring, troubleshooting, and deployment activities.
- Worked with **CI/CD pipelines** and containerized environments, leveraging **Docker** for application packaging and deployment.
- Participated in code reviews, sharing knowledge with team members and contributing to a culture of continuous improvement and learning.

SKILLS

Languages – Java, Python, SQL, Linux Shell Scripting.

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn.

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch).

Databases – PostgreSQL, MySQL, Oracle.

Tools & Technologies – Docker, Kubernetes, Jenkins, Git, Jira, Confluence, Splunk, Dynatrace, REST APIs.

Methodologies – Agile, Scrum, TDD.

PROJECTS

Enterprise Java Backend Service Development

- Developed a **Java Spring Boot** application to manage user authentication and authorization, integrating with an external identity provider.
- Implemented **RESTful APIs** for seamless data integration between the new service and existing enterprise systems, processing approximately **500 requests per minute**.
- Containerized the application using **Docker** and deployed it to an **AWS EC2** instance, ensuring high availability and scalability.

Python-based Data Pipeline Automation

- Built a **Python** data pipeline using **pandas** to extract, transform, and load data from multiple sources into a central repository.
- Automated daily data reconciliation tasks, reducing manual effort by **40%** and improving data accuracy for downstream reporting.
- Scheduled and monitored pipeline execution using **cron jobs** on a **Linux** server, ensuring timely data availability.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
