HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and developed **secure, scalable backend services** using **Java Spring Boot** and **RESTful APIs**, contributing to a cloud-native platform.
- Implemented **Hibernate** for data persistence in a **Java** application, managing complex relational data models and ensuring data integrity across multiple services.
- Authored **JUnit** tests and participated in rigorous **code reviews**, adhering to clean code principles and enhancing overall software quality for enterprise applications.
- Collaborated with cross-functional teams to define technical requirements and contribute to architectural decisions for new backend features, aligning with Agile development practices.
- Supported **24/7 production environments** through proactive monitoring, incident response, and troubleshooting, ensuring high availability and operational excellence for critical services.
- Containerized backend applications using **Docker** and deployed them to **Kubernetes** clusters, managing configurations and ensuring smooth rollout of new features.
- Developed **Python** scripts for data pipeline automation and scheduled reporting, improving efficiency and reducing manual effort for data processing tasks.

SKILLS

Languages – Java, Python, SQL, Go

Frameworks & Libraries – Spring Boot, Hibernate, JUnit, pandas, NumPy, Flask, FastAPI

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch), Azure, Google Cloud Platform

Containerization & Orchestration – Docker, Kubernetes

Databases – PostgreSQL, MySQL, Oracle

CI/CD & Operations – Jenkins, Git, Jira, Confluence, Splunk, Dynatrace, Linux

API Design – RESTful APIs, Microservices, Asynchronous Messaging, Event-Driven Architectures

PROJECTS

Enterprise Java Microservices for Financial Operations

- Developed a suite of **Java Spring Boot microservices** to process and monitor financial transactions, integrating with **PostgreSQL** for data storage.
- Implemented **Hibernate** for efficient data access and manipulation, ensuring transactional integrity for critical operations and reducing query times by **~18%**.
- Containerized services using **Docker** and managed deployments on an internal cluster, improving deployment consistency and reducing environment setup time by **40%**.

Python-based Data Pipeline for Transaction Reconciliation

- Engineered an automated **Python** data pipeline using **pandas** to ingest, transform, and reconcile transaction data from multiple sources, handling approximately **50,000 records daily**.
- Developed **RESTful APIs** with **Flask** to expose processed reconciliation data, enabling integration with downstream reporting tools and reducing manual data retrieval requests by **75%**.
- Implemented comprehensive logging and error handling within the pipeline, ensuring maintainability and facilitating rapid troubleshooting of data discrepancies.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
