PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Executed field service operations for power and distribution transformers, including **installation**, **commissioning**, and **testing** activities at customer sites across Ireland and Northern Ireland.
- Performed routine and preventative **maintenance**, **inspections**, and condition assessments on transformers to ensure optimal reliability and availability, contributing to **asset health**.
- Conducted in-depth **transformer diagnostics**, **fault finding**, and root cause analysis on complex electrical and mechanical systems to identify and resolve operational issues.
- Managed **transformer oil sampling**, **testing**, and treatment processes, implementing data-driven insights to maintain peak asset performance and longevity.
- Completed transformer **repairs**, **upgrades**, and retrofit projects, ensuring adherence to stringent safety protocols and customer-specific technical requirements.
- Prepared comprehensive **service reports**, **commissioning documentation**, and technical handover packages for clients, ensuring clear communication of project outcomes.
- Developed and maintained **Linux shell scripts** for automating log analysis and system health checks, improving incident detection speed by approximately **15%**.

SKILLS

Field Service – Installation, Commissioning, Testing, Maintenance, Repair, Diagnostics, Fault Finding, Root Cause Analysis, Site Operations

Transformers – Power Transformers, Distribution Transformers, Transformer Accessories, High-Voltage Equipment, Protection Systems, Cooling Systems, Bushings, Tap Changers

Electrical Infrastructure – Power Systems, Electrical Infrastructure, Asset Management, Condition Assessment

Tools & Technologies – Computerised Maintenance Management Systems (CMMS), Digital Service Tools, Shell Scripting, Linux

Project Management – Service Reporting, Documentation, Technical Records, Customer Handover, Project Planning, Collaboration

PROJECTS

Transformer Diagnostics and Maintenance Automation

- Developed Python scripts to process and analyze diagnostic data from transformer sensors, enabling predictive maintenance insights for a fleet of **50+ units**.
- Automated the generation of routine maintenance reports by integrating data from CMMS and sensor logs, reducing manual reporting effort by **~20%**.
- Implemented a modular framework for fault-finding diagnostics, standardizing troubleshooting steps for common electrical and mechanical issues.

Electrical Infrastructure Support System

- Designed and implemented a Java Spring Boot application to manage service requests and track maintenance schedules for enterprise electrical assets.
- Integrated with a PostgreSQL database to store asset history, maintenance logs, and performance metrics, supporting over **1,000 asset records**.
- Developed RESTful APIs for data retrieval and updates, enabling integration with existing asset management platforms.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
