HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Standardized and automated artefact generation across multiple platforms using **Jenkins** and **GitLab CI**, enabling consistent build outputs for PC and console targets.
- Developed and managed end-to-end release processes, integrating build, test, and deployment stages to streamline the delivery of game updates.
- Optimized source control workflows by implementing Git branching strategies and code review processes, reducing merge conflicts by an estimated **30%**.
- Managed and assisted in microservice development and deployment life cycles for backend services supporting game features, ensuring high availability.
- Maintained and improved build systems and infrastructure reliability by proactively monitoring performance metrics and addressing bottlenecks in the CI/CD pipeline.
- Implemented and enforced basic security best practices across pipelines and infrastructure, including access control and secrets management using **HashiCorp Vault**.
- Debugged, troubleshot, and resolved pipeline and infrastructure issues efficiently, reducing average resolution time for P1 incidents by **20%**.

SKILLS

CI/CD & Version Control – Jenkins, GitLab CI, Git, Perforce, CI/CD pipelines

Cloud & Infrastructure – AWS, Docker, Kubernetes, Terraform, CloudFormation

Scripting & Automation – Python, Shell Scripting

Configuration Management – Ansible, Chef, Puppet

Operating Systems – Linux, Windows Server

Security – Secrets Management, Access Control, Pipeline Security

PROJECTS

Automated Game Build and Release Pipeline

- Engineered an automated build and release pipeline using **Jenkins** and **Docker** to standardize artefact generation for multiple game platforms, including PC and console.
- Integrated **Perforce** source control management into the CI/CD workflow, optimizing build triggers and code checkout processes for faster iterative development.
- Implemented pipeline security measures, including credential management with **HashiCorp Vault**, to protect sensitive build artifacts and deployment keys.

Microservice Deployment Automation with Kubernetes

- Developed deployment automation scripts using **Helm** and **Kubernetes** to manage the lifecycle of game backend microservices, enabling consistent and scalable rollouts.
- Configured **AWS EKS** infrastructure for hosting microservices, focusing on reliability and efficient resource utilization for development and staging environments.
- Wrote detailed operational runbooks and documentation for the microservice deployment process, facilitating smoother handoffs to the operations team.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
