PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Implemented and configured **firewalls** and **VPN technologies** for enterprise clients, ensuring secure network perimeter defenses and remote access capabilities.
- Deployed and managed **network security controls**, including network segmentation and access control solutions, to isolate critical systems and limit the blast radius of potential breaches.
- Conducted security assessments of client environments, identifying **security risks** and configuration weaknesses through detailed analysis of infrastructure and system logs.
- Investigated and responded to **security-related incidents**, performing root cause analysis and coordinating remediation efforts with client IT teams to minimize operational impact.
- Supported vulnerability remediation and **security hardening activities** across diverse client infrastructures, applying best practices to reduce attack surfaces.
- Participated in client-facing discovery workshops to gather detailed **customer security requirements** and translate them into actionable technical specifications for solution design.
- Containerized and deployed security tools and services using **Docker** on **AWS EC2** instances, ensuring consistent and scalable operational environments for managed security solutions.

SKILLS

Security Technologies – Firewalls, VPN technologies, Secure remote access, Network security controls, Network segmentation, Access control solutions, Vulnerability remediation, Security hardening

Security Operations – Security incident investigation, Threat response, Security assessments, Security reviews, Cyber security, Infrastructure protection

Cloud & Infrastructure – AWS (EC2, CloudWatch), Docker, Linux, Shell scripting

Project Delivery – Security-focused project delivery, Technical discovery, Client consulting, Solution design, Documentation

Networking – Network security fundamentals, Secure remote access solutions

Tools & Methodologies – Jira, Confluence, Git, Jenkins, Python scripting, SQL

PROJECTS

Enterprise Network Security Hardening Initiative

- Designed and implemented comprehensive **firewall rulesets** and **VPN configurations** for a mid-sized financial services client, enhancing their network segmentation and secure remote access posture.
- Conducted a thorough review of existing network infrastructure, identifying critical **security risks** and recommending remediation steps that were subsequently actioned by the client's operations team.
- Developed detailed technical documentation for the implemented security controls, serving as a reference for ongoing operational support and future audits.

Client Security Posture Assessment Framework

- Developed a repeatable framework for conducting **security assessments** and reviews for new enterprise clients, focusing on identifying configuration weaknesses and compliance gaps.
- Built Python scripts to automate the collection of security-relevant configuration data from client environments, reducing manual assessment time by approximately **30%**.
- Presented findings and actionable recommendations to client stakeholders, outlining prioritized steps for **vulnerability remediation** and security hardening to improve their overall cyber resilience.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
