HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Managed production support for enterprise applications, focusing on SLA adherence and incident response for P1/P2 issues, utilizing **Splunk** and **Dynatrace** for system observability.
- Automated data extraction and transformation tasks using **Python** scripts, developing ETL pipelines and scheduled reports that reduced manual processing time by approximately **30%**.
- Developed and maintained REST APIs using **Java Spring Boot** for inter-service communication, ensuring robust error handling and API contract adherence.
- Implemented and managed CI/CD pipelines using **Jenkins** and **Git** for automated builds, testing, and deployments, improving deployment frequency by **20%**.
- Configured and managed cloud infrastructure on **AWS**, including EC2 instances and S3 buckets, for application hosting and data storage.
- Participated in Agile ceremonies and conducted code reviews within a Scrum framework, contributing to the successful delivery of new features and bug fixes.
- Administered Linux-based systems, performing log analysis, shell scripting, and cron job scheduling to maintain operational efficiency and troubleshoot system issues.

SKILLS

SRE/DevOps – Site Reliability Engineering, DevOps, System Reliability, High Availability, Scalability, Disaster Recovery, Fault Tolerance, Incident Management, Problem Management, Change Management, Observability, Monitoring, Logging, Metrics, Tracing

Cloud Infrastructure – AWS, Azure, GCP, EC2, S3, Lambda, CloudWatch

Scripting/Programming – Python, Go, Bash, Java, Spring Boot, .NET

Operating Systems & Networking – Linux, Unix, Networking, Troubleshooting

Databases & Data Management – PostgreSQL, MySQL, Oracle, SQL, Data Warehousing

CI/CD & Tools – Jenkins, Git, Jira, Confluence, Docker

PROJECTS

Enterprise Application Production Support Enhancement

- Streamlined incident triage and root cause analysis for a suite of Java and .NET enterprise applications by developing custom dashboards in **Splunk**, reducing average resolution time for critical incidents by **15%**.
- Automated the generation of weekly operational reports using **Python** and SQL queries against PostgreSQL, consolidating data from multiple sources and saving approximately **8 hours** of manual effort per week.
- Implemented proactive monitoring alerts for key system metrics on **AWS CloudWatch**, leading to the early detection of performance degradation in **3** critical services before user impact.

Automated Financial Reconciliation Workflow

- Developed a Python-based system to automate the reconciliation of transaction data from disparate sources, processing over **5,000** records daily and identifying discrepancies with **98%** accuracy.
- Integrated the reconciliation system with an existing Java Spring Boot service via REST APIs, enabling automated flagging and reporting of reconciliation failures to operations teams.
- Containerized the Python reconciliation service using **Docker** for consistent deployment across development and production environments.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
