PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Configured **Microsoft Sentinel** workspaces, analytics rules, and automation rules to ingest and process security telemetry from diverse sources for enterprise clients.
- Onboarded and validated **Microsoft Defender XDR workloads** including Defender for Endpoint and Defender for Office 365, establishing integrated detection capabilities.
- Designed and implemented data filtering and transformation logic within Azure Monitor Log Analytics to optimize ingestion costs and improve signal quality for **SIEM** analysis.
- Developed **Kusto Query Language (KQL)** queries for in-depth data validation, troubleshooting log source ingestion issues, and tuning detection rules to reduce false positives by approximately 30%.
- Managed technical discovery sessions with clients to identify log sources, assess data volumes, and define connectivity requirements for new **Microsoft Sentinel** deployments.
- Collaborated with Security Operations Centre (SOC) teams to tune analytics rules and incident generation logic, ensuring accurate and actionable alerts for security threats.
- Authored comprehensive high-level design documents, implementation plans, and operational runbooks for client **Microsoft Sentinel** onboardings, facilitating smooth service transition.

SKILLS

SIEM & Security Platforms – Microsoft Sentinel, Microsoft Defender XDR, Azure Monitor, Log Analytics, Kusto Query Language (KQL)

Cloud Platforms – Microsoft Azure (Azure Monitor Agent, Data Collection Rules, Azure services)

Log Management & Ingestion – Syslog, CEF, API connectors, Custom log sources, Data transformation, Ingestion filtering

Security Operations – Detection tuning, Incident response, Security monitoring, Threat detection, Log source onboarding

Documentation & Process – High-level design, Implementation plans, Runbooks, Change control, Technical discovery

PROJECTS

Enterprise Microsoft Sentinel Onboarding Framework

- Engineered a standardized framework for onboarding clients to **Microsoft Sentinel**, incorporating reusable templates for workspace configuration and data connector setup.
- Developed **KQL scripts** to automate log source validation and data parsing checks, reducing manual verification time by an estimated 40% per client.
- Created detailed technical documentation and runbooks, enabling faster handover to SOC teams and improving overall service support efficiency.

Microsoft Defender Suite Integration for Enhanced Threat Detection

- Integrated **Microsoft Defender for Endpoint** and **Defender for Identity** logs into a central **Log Analytics workspace** for unified security monitoring.
- Configured data collection rules and ingestion filters to prioritize critical security events from Defender workloads, improving detection accuracy for common attack vectors.
- Assisted in tuning detection rules based on client-specific security policies and observed threat landscapes, reducing alert noise by ~25%.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
