HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained **Python**-based backend components and automation scripts for enterprise applications, processing over **5,000** data points daily.
- Contributed to the development of **machine learning models** using **Scikit Learn**, focusing on feature engineering and initial model validation.
- Supported web hosting projects by configuring and managing **AWS EC2** instances and associated networking components.
- Participated in **code reviews** and contributed to comprehensive technical **documentation** for new software features and system integrations.
- Integrated various systems via **REST APIs**, ensuring secure data exchange between internal services and external platforms.
- Optimised system performance by identifying and resolving bottlenecks in **Java Spring Boot** services, reducing average response times by **18%**.
- Managed production incidents for critical enterprise applications, performing root cause analysis and implementing fixes within strict **SLA** targets.

SKILLS

Programming Languages – Python, Java, SQL

Machine Learning – TensorFlow, PyTorch, Scikit Learn, Algorithms, Data Structures

Web Development – Backend Components, API Integration, Web Hosting

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Development Practices – Automation Scripts, Secure Software Development, Code Reviews, Documentation, Continuous Improvement, Agile, Linux, Bash Scripting, Networking Concepts

PROJECTS

Python Automation for Data Pipelines

- Engineered a **Python**-based ETL pipeline to ingest and transform data from multiple enterprise sources, automating daily report generation for the operations team.
- Implemented data validation checks within the pipeline, reducing data quality issues by **30%** and improving downstream reporting accuracy.
- Containerised the pipeline using **Docker** for consistent deployment across development and production environments.

Machine Learning Model Development Framework

- Developed a reusable framework in **Python** and **Scikit Learn** to streamline the process of building and evaluating classification models.
- Integrated feature selection and extraction modules, enabling faster iteration on model development for a fraud detection use case, achieving an initial **0.78 AUC**.
- Wrote unit tests and integration tests using **pytest** to ensure the reliability and correctness of the ML pipeline components.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
