PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented scalable data models in **BigQuery** for the analytical data warehouse, improving query performance by an average of **30%** and ensuring data accessibility for Product and Delivery teams.
- Developed and maintained **Python**-based ETL/ELT pipelines to ingest, transform, and structure data from various sources, incorporating **data quality controls** and establishing consistent metric definitions for reporting.
- Built interactive **Power BI dashboards** and reports to visualize key performance indicators and product adoption metrics, enabling Product and Commercial teams to make faster, data-informed decisions.
- Collaborated with the Engineering team on optimizing cloud data infrastructure in **GCP**, focusing on performance enhancements and cost efficiency for the **BigQuery** platform.
- Captured and validated data at source, identifying gaps in existing data collection and developing reliable methods to measure **product adoption** and **clinical efficiency**, contributing to impact measurement.
- Enabled self-service insights by developing accessible reporting tools and exploring AI-assisted data interpretation, ensuring appropriate **access controls** and permissions for trusted data access.
- Containerized data pipeline services using **Docker** and deployed them to a cloud environment, managing configuration and resource allocation for predictable rollouts.

SKILLS

Cloud Data Platforms – BigQuery, GCP, AWS, Azure

Programming & Scripting – Python, SQL, Bash

Data Engineering & ETL – Data Pipelines, ELT, Data Transformation, Data Modelling, Data Quality

Business Intelligence & Analytics – Power BI, Tableau, DAX, Reporting, Data Visualization

DevOps & Infrastructure – Docker, CI/CD, Jenkins, Git

PROJECTS

Healthcare Data Pipeline and Analytics Platform

- Engineered robust **Python** data pipelines to process and transform sensitive healthcare data, ensuring compliance with data governance and privacy standards.
- Developed a centralized **analytical data model** in **BigQuery** to support cross-functional reporting on patient pathway progression and clinical outcomes.
- Built a suite of **Power BI dashboards** for client-facing delivery teams to monitor pathway performance and identify areas for operational improvement, enhancing client value demonstration.

Customer Data Integration & Reporting Framework

- Designed and implemented a flexible framework using **Python** and **SQL** to integrate data from diverse healthcare provider systems into the central analytics platform.
- Created automated reporting modules that delivered timely insights on **product adoption** and system usage to internal stakeholders and client success managers.
- Managed data quality and validation checks throughout the integration process, reducing data discrepancies by **20%** for upstream reporting.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
