PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented reusable **React** components and a consistent design system for a client-facing analytical application, translating wireframes into production-ready code.
- Developed interfaces for AI solutions, including a **document review tool** and a model output explorer, enabling business users to interact with complex AI model results.
- Integrated analytical applications with APIs and data platforms such as **Databricks**, collaborating with data engineers to ensure seamless data flow for visualization.
- Built and maintained interactive dashboards and analytical apps using **Plotly** and **Dash**, ensuring client branding and aesthetic consistency across deliverables.
- Authored **Python scripts** to process and transform data for analytical dashboards, supporting data engineers in preparing datasets for model consumption.
- Managed application deployment pipelines using **CI/CD** best practices, incorporating code reviews and security considerations for reliable releases.
- Ran technical demos and gathered feedback from **client stakeholders** on new dashboard features, iterating rapidly based on their input to improve usability.

SKILLS

Frontend – React, JavaScript, TypeScript, HTML, CSS, Plotly.js, Dash

Backend/API – Python, FastAPI, REST APIs

Data/Analytics – SQL, Databricks, Power BI, DAX, Data Modelling

DevOps/Cloud – AWS, Docker, CI/CD, Jenkins, Git

Methodologies – Agile, Scrum, Client-Facing Delivery

PROJECTS

Interactive AI Model Explorer Dashboard

- Developed a **React**-based dashboard to visualize outputs from an AI model, including confidence scores and source evidence for user trust.
- Integrated the dashboard with a **FastAPI** backend service that served model predictions via REST API, handling approximately 150 requests per minute.
- Implemented custom **Plotly** charts to represent complex model data, ensuring clear and accessible presentation for non-technical business users.

Client Data Visualisation Platform (HCL Technologies)

- Built interactive **Power BI** dashboards for a financial-services client, translating operational data into actionable insights for transaction monitoring workflows.
- Developed **Python scripts** for ETL processes to aggregate and clean data from multiple sources, feeding into the reporting dashboards.
- Collaborated with business analysts and operations teams to gather requirements and support User Acceptance Testing for new dashboard features.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
