HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented scalable **Node.js** and **TypeScript** backend services for a global analytics platform, handling real-time and historical datasets for thousands of publishers.
- Developed and optimized **REST APIs** to support analytics products, focusing on efficient data retrieval and integration with various data sources.
- Engineered data models and optimized **SQL** queries for **MySQL** and **MongoDB**, improving system performance and latency for data-intensive operations.
- Collaborated with product managers, data specialists, and frontend engineers within an **Agile** development environment to deliver complex product solutions.
- Integrated **AI-powered coding tools** such as GitHub Copilot into daily workflows, enhancing productivity and code quality for backend development tasks.
- Contributed to **CI/CD** pipelines using **Jenkins** and GitHub Actions, ensuring reliable deployment processes and continuous integration for new services.
- Participated in code reviews and architectural discussions, contributing to technical designs for new product features and backend services.

SKILLS

Backend Development – Node.js, TypeScript, REST APIs, API Design, Microservices

Databases – MySQL, MongoDB, ClickHouse, SQL, Data Modeling, Query Optimization

Cloud & DevOps – AWS, Docker, Jenkins, GitHub Actions, CI/CD

Methodologies – Agile, Scrum

AI Tools – GitHub Copilot, Claude Code, Cursor

Languages – JavaScript, Python, English, Spanish

PROJECTS

Real-Time Analytics API for Publisher Data

- Developed a high-performance **Node.js** and **TypeScript** backend service to ingest and serve real-time analytics data to publisher clients.
- Implemented efficient **API endpoints** using **MySQL** for structured data and **MongoDB** for flexible event logging, ensuring data consistency and low latency.
- Integrated **Docker** for containerization and deployed the service on **AWS EC2** instances, managing scaling based on traffic patterns.

Data Pipeline Optimization for Large Datasets

- Engineered Python scripts to automate the extraction, transformation, and loading (ETL) of large datasets from diverse sources into a data warehouse.
- Optimized **SQL queries** and database schemas in **PostgreSQL**, reducing data processing times by approximately 30% for analytical reporting.
- Developed scheduled reporting jobs using Python scripts and cron, delivering key operational metrics to business stakeholders.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
