HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **Java Spring Boot** RESTful APIs for core service integrations, focusing on asynchronous communication patterns and reducing request latency by **30%**.
- Developed and maintained backend services using **Hibernate** and **JPA**, managing complex object-relational mappings and ensuring data integrity across a distributed database landscape.
- Authored comprehensive unit and integration tests using **JUnit** and **Mockito**, achieving over **90% code coverage** for critical business logic modules and enhancing overall code quality.
- Collaborated with product managers to translate business requirements into technical specifications for new SaaS features, contributing to sprint planning and technical estimation processes.
- Participated actively in **code reviews**, providing constructive feedback to peers and junior engineers to uphold coding standards and improve maintainability.
- Designed and deployed containerized backend services using **Docker**, orchestrating deployments on **AWS EC2** instances and improving application portability across environments.
- Contributed to the evolution of the software architecture, focusing on building **scalable microservices** and event-driven systems to support growing customer demand.

SKILLS

Languages – Java, Kotlin, Python, SQL, R, English

Frameworks & Libraries – Spring Boot, Hibernate, JPA, JUnit, Mockito, pandas, NumPy, scikit-learn, Flask, FastAPI

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch, SES, SQS, SNS), Docker, Jenkins, Git, OpenAPI

Databases – MySQL, PostgreSQL, Elasticsearch

Methodologies – Agile, Scrum

Tools – Jira, Confluence

Concepts – Microservices, Event-Driven Architecture, RESTful APIs, Distributed Systems, Containerization, Cloud Computing

PROJECTS

Scalable Java Microservices for Enterprise Operations

- Developed a suite of **Java Spring Boot** microservices to manage enterprise operational data, processing over **5,000 transactions** per hour.
- Implemented asynchronous communication using **AWS SQS** and **SNS** to decouple services and enhance system resilience, improving message processing throughput by **20%**.
- Integrated with **MySQL** databases using **Hibernate**, designing efficient data models and optimizing queries to support real-time reporting dashboards.

Backend API for Real-time Data Ingestion

- Engineered a **FastAPI** backend service in Python to handle real-time data ingestion streams from distributed sources, capable of processing up to **3,500 events/sec**.
- Designed and implemented RESTful APIs adhering to **OpenAPI** specifications, enabling seamless integration with downstream analytics and reporting tools.
- Containerized the application using **Docker** for consistent deployment across development and production environments, reducing setup time by **40%**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
