HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Managed production incident response for enterprise applications, triaging P1/P2 issues and restoring service within defined SLAs using **Splunk** and **Dynatrace**.
- Developed **Python** scripts to automate ETL processes for scheduled reporting, reducing manual data aggregation time by approximately **30%**.
- Engineered **Java Spring Boot** REST APIs for cross-service data exchange, implementing request validation and circuit-breaker patterns for improved system stability.
- Configured and maintained **AWS** infrastructure including EC2 instances, S3 buckets, and Lambda functions, ensuring scalable and reliable deployments.
- Built and optimised secure **CI/CD** pipelines using **Jenkins** and **Git**, enabling automated testing and deployment for core applications.
- Operated and scaled blockchain validator nodes across **multi-cloud** and **bare-metal** environments, ensuring high availability and performance for critical network functions.
- Designed and implemented telemetry solutions using **Prometheus** and **Grafana**, providing actionable insights into infrastructure health and performance for proactive issue resolution.

SKILLS

Cloud & DevOps – AWS, GCP, Kubernetes, Docker, Terraform, OpenTofu, Helm, GitHub Actions, Jenkins, CI/CD, Infrastructure as Code

Blockchain – Validator Infrastructure, Decentralised Networks, Protocol Reliability, Network Operations

Programming & Scripting – Python, Rust, Go, Java, Spring Boot, Shell Scripting

Databases – PostgreSQL, MySQL, Oracle, SQL

Observability & Monitoring – Grafana, Prometheus, Splunk, Dynatrace, CloudWatch

Operating Systems – Linux

PROJECTS

Blockchain Node Automation Framework

- Developed a Python-based framework to automate the deployment and configuration of blockchain validator nodes on both AWS EC2 and bare-metal servers.
- Integrated **Terraform** for infrastructure provisioning and **Ansible** for configuration management, ensuring repeatable and scalable deployments across distributed environments.
- Implemented comprehensive monitoring using **Prometheus** and **Grafana**, tracking key node metrics like uptime, resource utilization, and transaction throughput.

Secure CI/CD Pipeline for Infrastructure Code

- Designed and built a secure **GitHub Actions** CI/CD pipeline to automate the testing and deployment of **Terraform** configurations for cloud infrastructure.
- Incorporated automated security scanning and compliance checks within the pipeline, identifying and mitigating potential vulnerabilities before deployment.
- Managed containerized build agents using **Docker**, ensuring consistent and reproducible build environments for all infrastructure code changes.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
