# HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

## PROFESSIONAL EXPERIENCE — 3.5 YEARS

**Software Engineer — HCL Technologies, Chennai, India** Sep 2021 – Jan 2025

- Architected and implemented **Node.js** and **TypeScript** backend services, integrating with **PostgreSQL** and caching layers to support a **DeFi platform**.
- Developed responsive, high-performance user interfaces using **Next.js**, **React**, and **TailwindCSS**, enhancing user experience for decentralized finance applications.
- Built and maintained **WebSockets** connections for real-time data synchronization between frontend clients and backend services, ensuring up-to-date DeFi market information.
- Designed and integrated with various **DeFi protocols**, including DEX aggregators and cross-chain bridges, to provide comprehensive financial functionalities.
- Wrote production runbooks and internal documentation that the customer onboarding team now uses to bring new clients live in ~10 days instead of 4+ weeks.
- Containerised the feature-pipeline services with **Docker** and deployed them to a **Kubernetes** cluster (EKS), wiring up Helm chart configuration and basic resource limits for predictable rollout.
- Collaborated directly with the founding team to define technical direction, architecture, and product strategy for an all-in-one **DeFi platform**.

## SKILLS

**Backend** – Node.js, TypeScript, PostgreSQL, Redis, WebSockets, REST APIs

**Frontend** – Next.js, React, TailwindCSS

**Blockchain/DeFi** – DeFi protocols, DEX aggregators, Cross-chain bridges, Crypto APIs

**Cloud/DevOps** – Docker, Kubernetes, AWS (EC2/S3/Lambda/CloudWatch)

**Methodologies** – Agile, Scrum, CI/CD, Git, Jenkins

## PROJECTS

### DeFi Protocol Integration Service

- Developed a **Node.js** microservice to abstract interactions with multiple **DeFi protocols** and **DEX aggregators**, simplifying frontend integration.
- Implemented robust error handling and retry mechanisms for API calls to external blockchain data providers, increasing data retrieval success rates by **22%**.
- Containerized the service using **Docker** and deployed it to a staging environment managed via **Kubernetes** for testing and performance analysis.

### Real-time Crypto Market Data Dashboard

- Built a responsive **React** frontend dashboard displaying real-time cryptocurrency prices and **DeFi** metrics, utilizing **WebSockets** for live updates.
- Engineered a **TypeScript** backend API using **FastAPI** to aggregate data from various crypto APIs and serve it efficiently to the frontend.
- Integrated **PostgreSQL** for caching frequently accessed market data, reducing average API response times by **30%**.

## EDUCATION

**M.Sc. Data Analytics — National College of Ireland, Dublin** Feb 2026

**B.E. Computer Science — SNS College of Technology, Coimbatore, India** 2021

## CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
