PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Analyzed and resolved recurring application incidents on **banking applications**, implementing corrective measures that reduced P1 escalations by **18%**.
- Monitored **enterprise applications** using **Splunk** and **CloudWatch**, establishing alerts for critical system events and coordinating responses with operations teams.
- Developed **Python scripts** to automate ETL processes for daily operational reporting, reducing manual data compilation time by approximately **6 hours** per week.
- Investigated and troubleshot application errors in test environments, collaborating with developers and software vendors to implement fixes and workarounds.
- Configured and administered application settings and user roles for **OpenLease**, ensuring adherence to security policies and business requirements.
- Contributed to major incident management by performing fault diagnosis, coordinating resolution efforts, and communicating status updates to stakeholders.
- Documented technical investigations, configuration changes, and incident resolutions in **Confluence**, enhancing the team's knowledge base and onboarding materials.

SKILLS

Application Support – Incident Management, Problem Management, Root Cause Analysis, IT Service Management, SLA Management, User Access Administration.

Monitoring & Logging – Splunk, CloudWatch, Dynatrace.

Development & Scripting – Java, Spring Boot, Python, REST APIs, SQL, Shell Scripting.

Cloud & Infrastructure – AWS (EC2, S3, Lambda), Docker, Linux.

Collaboration Tools – Jira, Confluence.

Database Technologies – PostgreSQL, MySQL, Oracle.

PROJECTS

HCL Production Support Automation

- Developed Python automation scripts to streamline routine production support tasks, including log analysis and system health checks for enterprise applications.
- Implemented automated data validation checks using SQL queries against PostgreSQL databases, reducing manual data verification effort by **40%** for batch reconciliation workflows.
- Created shell scripts to automate log file rotation and archiving on Linux servers, ensuring efficient disk space management and historical data accessibility.

Financial Operations Dashboard Enhancement

- Supported the development and maintenance of a financial services operations dashboard, focusing on transaction monitoring and alerting for failed payment messages.
- Wrote SQL queries to extract and aggregate data for operational reports, aiding in the identification of patterns in transaction processing errors.
- Collaborated with business analysts to refine dashboard features, ensuring accurate display of key operational metrics for the payments processing team.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
