HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and developed **Go** microservices for secure secrets management, implementing concurrency patterns with goroutines and channels to handle high-volume requests.
- Contributed to **OpenBao** architectural discussions with engineering leadership, breaking down complex roadmaps into actionable tasks and technical RFCs.
- Wrote secure, high-performance **Go** code, adhering to secure-by-design principles and cryptographic best practices for identity-aware platforms.
- Participated in upstream **open-source** development by reviewing pull requests and triaging issues for community contributions.
- Developed comprehensive **unit, integration, and security tests** for core platform features, ensuring software quality and production reliability.
- Supported **CI/CD automation** and release workflows, enhancing the supply chain security for distribution artifacts.
- Analyzed and resolved reported **vulnerabilities**, contributing to the overall security and reliability of the secrets management platform.

SKILLS

Languages – Go, Python, Java, SQL, R

Frameworks & Libraries – Spring Boot, Flask, FastAPI, pandas, NumPy, scikit-learn, goroutines, channels

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Jenkins, Terraform, OpenTofu, Helm

Databases – PostgreSQL, MySQL, Oracle

Security & Identity – OpenBao, HashiCorp Vault, PKI/TLS, Cryptography, Authentication, Authorization, Secrets Management

Tools & Methodologies – Git, Jira, Confluence, Agile, Scrum, Linux, Splunk, Dynatrace, API Design

PROJECTS

Secure Secrets Management Plugin for OpenBao

- Developed a custom **Go plugin** for OpenBao to manage dynamic database credentials, integrating with **PostgreSQL** through a secure API.
- Implemented **TLS** encryption for all inter-service communication within the plugin, ensuring data integrity and confidentiality.
- Wrote extensive **unit and integration tests** in Go, achieving over 90% code coverage for the plugin's core logic.

Identity-Aware Access Control System

- Designed and built a backend service using **Go** and **FastAPI** to enforce identity-aware access policies for internal applications.
- Integrated with an **authentication** provider to validate user tokens and enforce role-based access controls, supporting approximately 500 requests per minute.
- Containerized the service using **Docker** and deployed it to a **Kubernetes** cluster, establishing basic CI/CD pipelines with **Jenkins**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
