HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained **Python backend services** and **REST APIs** using **FastAPI**, handling approximately 5,000 transactions per hour for a payments processing system.
- Integrated third-party payment service providers (PSPs) to manage **pay-in functionality**, **payment status callbacks**, and transaction lifecycle management, ensuring secure processing of sensitive data.
- Designed and implemented asynchronous workflows using **asyncio** and event loops for high-throughput data processing, reducing average request latency by **30%**.
- Deployed and managed containerized applications on **Kubernetes** clusters, configuring deployment strategies and monitoring resource utilization for improved system reliability.
- Wrote comprehensive **automated tests**, including unit and integration tests, achieving over **85% code coverage** and reducing regression bugs by **22%**.
- Collaborated with cross-functional teams to troubleshoot complex integration challenges with external payment providers, resolving an average of **5 critical issues** per sprint.
- Monitored application performance using cloud-native tools, identifying and resolving performance bottlenecks that improved system stability by **15%**.

SKILLS

Languages – Python, SQL, Bash

Frameworks/Libraries – FastAPI, Django, asyncio, pandas, NumPy, scikit-learn

Databases – PostgreSQL, MongoDB, Redis

Cloud/DevOps – Docker, Kubernetes, AWS (EC2, S3, CloudWatch), GitLab CI/CD

AI Tools – OpenAI Codex, Claude Code

Tools – Git, Jira, Confluence, Splunk, Dynatrace

PROJECTS

Python Payment Processing Gateway

- Engineered a **Python-based payment gateway** utilizing **FastAPI** and **PostgreSQL** to handle secure transaction processing for enterprise customers.
- Implemented asynchronous communication patterns with **RabbitMQ** for managing payment callbacks and status updates, ensuring reliable message delivery.
- Integrated AI-assisted development tools to accelerate code generation and testing, reducing development time for new features by an estimated **18%**.

Scalable Transaction Monitoring Service

- Developed a **Python microservice** deployed on **Kubernetes** for real-time transaction monitoring, processing over 10,000 events daily.
- Integrated **Redis** for caching frequently accessed transaction data, improving query performance by **40%**.
- Designed and implemented REST APIs for retrieving transaction history and status, supporting integration with internal financial reporting tools.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
