PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** microservices, designing and implementing **REST APIs** for inter-service communication and data exchange, handling approximately **4,000 requests per minute**.
- Engineered and optimized **Hibernate** queries and persistence logic for high-throughput transaction processing, reducing database load by **18%** during peak operational hours.
- Authored comprehensive unit and integration tests using **JUnit** and **Mockito** for critical Java components, achieving over **90% code coverage** for new feature development.
- Collaborated with product owners and business analysts in **Scrum ceremonies** to refine requirements, provide technical estimations, and ensure timely delivery of features for a payments processing platform.
- Contributed to the design and implementation of robust error handling and retry mechanisms within **Java-based payment workflows**, improving system resilience and reducing incident recurrence by **22%**.
- Containerized **Java Spring Boot** applications using **Docker**, defining multi-stage builds and optimizing image sizes for efficient deployment to cloud environments.
- Participated in **code reviews** for peer engineers, providing constructive feedback on code quality, adherence to design patterns, and alignment with architectural standards.

SKILLS

Core Java – Java, Spring Boot, Hibernate, JPA, JUnit, Mockito, Maven, Java EE

Backend & APIs – REST APIs, Microservices, Design Patterns, API Design

Databases – SQL, PostgreSQL, MySQL, Oracle, Enform, FUP, KLIST

HP NonStop Tandem – COBOL, SCOBOL, TACL, Pathway, Batchcom, NetBatch

Cloud & DevOps – AWS, EC2, S3, Lambda, CloudWatch, Docker, Jenkins, Git, Bitbucket, CI/CD

Methodologies – Agile, Scrum, SDLC, Testing, Deployment, Release Management

Domain – Payments Processing, Cards Processing, Banking Technology

PROJECTS

Java Persistence Layer for Transaction Processing

- Developed a robust data access layer using **Java Spring Boot** and **Hibernate** to manage transactional data for a financial services client, supporting over **5,000 concurrent operations**.
- Implemented complex mapping strategies and optimized SQL queries, resulting in a **30% reduction** in average response times for critical data retrieval operations.
- Integrated the persistence layer with existing batch processing jobs using **TACL scripts** and **NetBatch** for scheduled data reconciliation and reporting.

Automated Payment Message Validation Service

- Built a **Java microservice** that automatically validates incoming payment messages against predefined schemas, catching approximately **65% of malformed messages** before downstream processing.
- Designed a flexible configuration system allowing the service to adapt to new payment message formats and regulatory updates with minimal code changes.
- Deployed the service as a **Docker container**, integrating it into an existing CI/CD pipeline managed by **Jenkins** for automated testing and deployment.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
