PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Provided technical pre-sales support for channel partners across EMEA, translating complex cybersecurity requirements into tailored solutions for prospective clients.
- Delivered compelling product demonstrations and technical presentations to diverse audiences, including IT executives and security operations teams, showcasing Keeper's value proposition.
- Collaborated closely with Channel Account Managers to enhance partner technical capabilities, directly contributing to incremental partner revenue through joint sales efforts.
- Acted as a technical advisor to channel partners, articulating how Keeper's platform addresses evolving business challenges and strategic security goals.
- Managed product trials and evaluations for partners, ensuring successful adoption and providing level-2 technical assistance to address implementation and integration queries.
- Analyzed complex multivariate security problems, employing a systematic approach to deliver swift resolutions under pressure for critical partner opportunities.
- Containerized and deployed backend services for an internal feature store on **AWS EKS**, managing Kubernetes configurations and scaling policies.

SKILLS

Cloud Technologies – AWS, Azure

Operating Systems – Windows, Linux, UNIX

Sales & Support Tools – Salesforce, Jira, Confluence

Networking & Security – Networking, Cybersecurity, Identity Providers, PAM

Languages & Scripting – Python, Java, SQL, Shell Scripting

Development Tools – Git, Jenkins, Docker

PROJECTS

Enterprise Cybersecurity Solution Implementation

- Designed and implemented a comprehensive cybersecurity solution for an enterprise client, integrating Keeper's core platform with their existing infrastructure.
- Conducted technical workshops with the client's IT security team to gather requirements and align solution architecture, ensuring seamless integration and adoption.
- Provided post-implementation technical support and training, addressing complex queries and ensuring the client achieved their security objectives.

Backend Service for Customer Identity Management

- Developed REST APIs using **Java Spring Boot** and **Hibernate** to manage customer identity and access controls for a secure enterprise platform.
- Implemented robust data validation and authentication mechanisms, handling approximately 1,500 authentication requests per hour during peak usage.
- Containerized the application using **Docker** and deployed it to a **PostgreSQL**-backed environment on **AWS EC2**, ensuring high availability and scalability.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
