PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Provided end-to-end ownership for the **Transact platform**, focusing on stability, resilience, and ongoing evolution in a complex **core banking** environment.
- Developed and maintained a **platform roadmap**, aligning critical business priorities with technology strategy and prioritizing technical debt reduction alongside feature enhancements.
- Oversaw platform capacity, performance, and emerging technology risks, performing root cause analysis on recurring incidents and driving permanent solutions through **problem management**.
- Designed and implemented **Java Spring Boot REST APIs** for cross-service data exchange, incorporating request validation and circuit-breaker patterns to enhance system reliability.
- Authored **Python scripts** for automating ETL processes and generating scheduled operational reports, improving data processing efficiency for downstream analytics.
- Managed the **build, packaging, and deployment lifecycle** for platform changes across development, testing, and production environments, ensuring controlled and repeatable release processes.
- Collaborated with cross-functional engineering teams to identify opportunities for process improvement, reducing manual intervention and strengthening overall **engineering capability**.

SKILLS

Core Banking Platform – Temenos Transact, JBoss, Java, Linux, Oracle

Platform Ownership – Roadmap Development, Technical Debt Management, Lifecycle Management, Resilience Requirements, Capacity Planning, Vulnerability Assessment

Engineering Leadership – Multidisciplinary Team Direction, Engineering Standards, Accountability, Process Improvement, Automation, Technical Risk Assessment

Operational Excellence – Monitoring, Observability, Incident Management, Problem Management, Change Management, Release Management, Production Readiness

DevOps & CI/CD – Build Automation, Packaging, Deployment Pipelines, Jenkins, Git, Docker

Data & Analytics – SQL, PostgreSQL, MySQL, Oracle, Power BI, DAX, Power Query, R, Tableau

Programming Languages – Java, Spring Boot, Python, SQL, R

PROJECTS

Enterprise Payments Operations Dashboard Enhancement

- Engineered enhancements for a **payments operations dashboard**, improving transaction monitoring capabilities for a financial services client.
- Developed **Python automation scripts** to streamline ETL processes for daily reconciliation reports, reducing manual data compilation time by approximately 40%.
- Implemented new alerting mechanisms within the dashboard to provide real-time notifications for failed payment messages, improving incident response times for the operations team.

Core Java Application Performance Optimization

- Optimized critical **Java Spring Boot** services by refactoring inefficient code paths and implementing strategic caching, resulting in a 30% reduction in p95 response times.
- Integrated **Hibernate** for improved data persistence layer performance, managing complex object-relational mappings and reducing database query overhead.
- Wrote comprehensive **JUnit and Mockito** tests to ensure code quality and functional correctness for newly developed REST API endpoints.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
