PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented scalable Python data pipelines on **AWS Lambda** and **S3** to process over 3,500 events per second during peak hours, replacing a less efficient batch job.
- Developed and maintained **Java Spring Boot** REST APIs for internal services, ensuring robust request validation and implementing circuit-breaker patterns for enhanced resilience.
- Engineered a fraud-detection model using **scikit-learn** on a ~280,000-row transaction dataset, achieving approximately **0.86 AUC** on held-out data.
- Collaborated with customer engineering teams to gather requirements for feature pipelines, translating business needs into actionable **Python** implementations for an enterprise ML platform.
- Containerized microservices using **Docker** and deployed them to a Kubernetes cluster (**EKS**), configuring Helm charts and resource limits for predictable deployments.
- Authored production runbooks and internal documentation that reduced the customer onboarding time from over 4 weeks to approximately 10 days.
- Participated in post-sales technical walkthroughs with customer teams, debugging integration issues and ensuring successful adoption of the ML platform.

SKILLS

Programming Languages – Python, Java, SQL, R, Bash

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch), Kubernetes (EKS)

Data Engineering & MLOps – Data Pipelines, ETL, CI/CD, Jenkins, Git, Docker, ML Model Training, scikit-learn, pandas, NumPy, FastAPI

Backend Frameworks – Java Spring Boot, Flask

Databases – PostgreSQL, MySQL, Oracle, Snowflake

Tools & Methodologies – Agile, Scrum, Jira, Confluence, Splunk, Dynatrace, Linux Shell Scripting, API Development, Unit Testing, Integration Testing, Threat Modelling

PROJECTS

Customer Onboarding Playbook for ML Feature Store

- Developed a guided onboarding flow for two pilot enterprise customers using **Python SDKs** and debug tooling, compressing time-to-first-feature from ~6 weeks to 9 days.
- Built a **Python CLI** to validate customer feature definitions against the platform schema pre-submission, catching ~70% of schema errors at write time.
- Conducted follow-up workshops with customer data teams to upskill their engineers on integrating with the ML platform.

Fraud Detection Model on Transaction Features

- Engineered a **Python** and **SQL** feature pipeline to extract behavioural signals from ~1.1 million transaction records.
- Trained a **LightGBM** classifier on extracted features, tuning class weights for a 1:140 fraud imbalance and achieving ~0.91 AUC / 0.46 F1 on a held-out month.
- Packaged the trained model behind a **FastAPI** inference endpoint, implementing input validation and logging p95 latency around 180ms.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
