# HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

## PROFESSIONAL EXPERIENCE — 3.5 YEARS

**Software Engineer — HCL Technologies, Chennai, India** Sep 2021 – Jan 2025

- Developed and maintained **Python** data pipelines on **AWS Lambda** and **S3** to ingest and process approximately **3,500 events/sec** during peak hours, replacing a less efficient scheduled-batch job.
- Engineered feature extraction pipelines in **Python** and **SQL** on a dataset of approximately **1.1 million transaction records**, creating behavioural signals for downstream analytics.
- Trained a **LightGBM classifier** on extracted features to identify fraudulent transactions, achieving **~0.91 AUC** and tuning class weights for a 1:140 imbalance.
- Collaborated with enterprise customers to gather requirements for and implement **Python**-based feature pipelines, serving as a primary technical contact during their onboarding process.
- Designed and implemented REST APIs using **Java Spring Boot** for inter-service data exchange, incorporating request validation and circuit-breaker patterns for enhanced resilience.
- Containerized feature pipeline services using **Docker** and deployed them to an **AWS EKS Kubernetes** cluster, configuring resources and managing deployments via Helm charts.
- Wrote and maintained production runbooks and internal documentation that streamlined the customer onboarding process, reducing average time-to-first-feature from over 4 weeks to approximately **10 days**.

## SKILLS

**Programming Languages** – Python, Java, SQL, R, TypeScript

**Cloud Platforms** – AWS (EC2, S3, Lambda, CloudWatch), Kubernetes, Docker

**Data Engineering & Analytics** – Pandas, NumPy, Scikit-learn, Power BI, Tableau, DAX, Power Query, Data Warehousing, ETL

**Frameworks & Libraries** – Spring Boot, Flask, FastAPI, NestJS

**Databases** – PostgreSQL, MySQL, Oracle, Snowflake

**DevOps & CI/CD** – Jenkins, Git, Agile, Scrum, CI/CD Pipelines, Code Reviews

**Observability & Monitoring** – Splunk, Dynatrace, CloudWatch

## PROJECTS

### Customer Onboarding for ML Feature Store

- Developed a guided onboarding flow for two pilot enterprise customers adopting an internal ML feature store, including SDK examples and debug tooling.
- Built a **Python** CLI to validate customer feature definitions against the platform schema, catching approximately **70%** of schema errors before submission.
- Conducted technical workshops with customer data teams to upskill their engineers on the feature store's capabilities and integration patterns.

### Fraud Detection Model on Transaction Features

- Engineered a feature pipeline using **Python** and **SQL** to extract behavioural signals from a transaction log of roughly **1.1M** records.
- Trained a **LightGBM classifier** on the derived features, achieving **~0.91 AUC** and **~0.46 F1** score on a held-out month of data.
- Packaged the trained model behind a **FastAPI** inference endpoint, implementing input validation and logging for feature drift with p95 latency around **180ms**.

## EDUCATION

**M.Sc. Data Analytics — National College of Ireland, Dublin** Feb 2026

**B.E. Computer Science — SNS College of Technology, Coimbatore, India** 2021

## CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
