HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained **Python** scripts to automate data ingestion and transformation processes for analytical reporting, handling approximately **5,000 records** per run.
- Engineered **Java Spring Boot** REST APIs to facilitate data exchange between core enterprise systems and new analytical platforms, processing an average of **1,200 requests** per hour.
- Designed and implemented data models and complex **DAX measures** within **Power BI** to support interactive dashboards for business stakeholders, presenting key performance indicators for a **15-person** analytics team.
- Collaborated with data engineers to perform **data quality assessment** and cleansing activities, ensuring reliable inputs for downstream **data analytics** and model development.
- Translated complex business processes into **production-level code** for applied analytics solutions, focusing on clear logic and maintainability.
- Performed **exploratory data analyses** using descriptive statistics and statistical methods to identify trends and patterns in large datasets.
- Supported **code-level troubleshooting** activities for analytical applications, diagnosing and resolving issues impacting data pipelines and reporting accuracy.

SKILLS

Languages – Python, SQL, Java, R

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn, FastAPI, Flask

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch), Azure, GCP

Databases – PostgreSQL, MySQL, Oracle

BI & Analytics Tools – Power BI, Tableau, DAX, Power Query, R/RStudio

ML / AI – Machine Learning, Generative AI, LLMs, RAG, Prompt Engineering, Model Evaluation, Model Validation, Predictive Analytics, Applied Analytics

DevOps & Tools – Docker, Kubernetes, Jenkins, Git, Jira, Confluence, Splunk, Dynatrace

PROJECTS

Predictive Analytics Model for Customer Churn

- Engineered a **Python** feature pipeline to extract behavioural and transactional data for **~150,000** customer records, preparing input for a predictive model.
- Trained and evaluated a **scikit-learn** logistic regression model to predict customer churn, achieving an **AUC of 0.78** on a held-out test set.
- Developed an **AWS Lambda** function to serve model predictions for a pilot internal dashboard, processing approximately **50 requests** per minute.

Interactive Sales Performance Dashboard

- Developed a comprehensive **Power BI** dashboard to visualize sales performance metrics, integrating data from multiple sources using **Power Query**.
- Implemented complex **DAX measures** to calculate key performance indicators, including rolling averages and year-over-year growth, for an **8-person** sales team.
- Published and shared interactive reports with business stakeholders, enabling data-informed decision-making and trend analysis.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
