PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and deployed **TypeScript** backend services on **AWS Lambda**, handling approximately **4,000 requests per second** during peak loads for an AI-assisted documentation platform.
- Designed and implemented **PostgreSQL** schemas and optimized complex relational queries to support heavy project documentation ingestion and reasoning for an enterprise SaaS platform.
- Collaborated with product management to translate complex user stories for AI-assisted workflow automation into actionable technical tasks within an Agile/Scrum framework.
- Containerized backend services using **Docker**, creating reusable images and contributing to the CI/CD pipeline for streamlined deployments.
- Authored comprehensive technical documentation and runbooks for new service features, reducing onboarding time for junior engineers by an estimated **30%**.
- Integrated **Python** scripts for data preprocessing and initial document analysis, feeding into the main AI-driven reasoning engine.
- Managed incident response for production systems, performing root cause analysis and implementing fixes within defined SLAs, ensuring high availability for critical B2B workflows.

SKILLS

Languages – TypeScript, Python, SQL, Java, R

Backend Frameworks – Node.js, NestJS, Spring Boot, Flask, FastAPI

Databases – PostgreSQL, MySQL, Oracle

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Jenkins, Git, GCP

AI/ML & Data – scikit-learn, pandas, NumPy, RStudio, Power BI, Tableau, DAX, Power Query, LLM, RAG, Document Parsing

PROJECTS

AI-Assisted Document Processing Backend

- Engineered a **TypeScript** backend service using **NestJS** to ingest and parse large volumes of project documentation for an AI platform.
- Implemented asynchronous processing queues and **PostgreSQL** data storage to manage terabytes of unstructured data, enabling complex reasoning capabilities.
- Developed RESTful APIs for document ingestion and retrieval, ensuring secure data handling and efficient querying for downstream AI model integration.

Python-based ETL and Data Pipeline Automation

- Automated data extraction and transformation processes from disparate sources using **Python** and **Pandas** for an enterprise reporting system.
- Designed and implemented ETL pipelines that processed over **500 GB** of data weekly, improving data accuracy for operational dashboards.
- Integrated automated data validation checks within the pipeline, reducing data quality issues reported by downstream users by approximately **20%**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
