PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Engineered Python data pipelines on **AWS Lambda** and **S3** to process ~3,500 events/sec for ML scoring, replacing a brittle scheduled-batch job.
- Developed and deployed a **gradient-boosted classifier** using **scikit-learn** on a ~280k-row labelled transactions dataset, achieving **~0.86 AUC** on held-out data for an internal anti-abuse workflow.
- Designed and shipped **Java Spring Boot** REST APIs for cross-service data exchange, incorporating request validation and circuit-breaker patterns.
- Acted as primary technical contact for three enterprise customer onboardings, gathering feature-pipeline requirements directly with their data science teams and translating them into **Python** implementations.
- Containerized feature-pipeline services with **Docker** and deployed to an **EKS** cluster, configuring **Helm** charts and resource limits for predictable rollouts.
- Wrote production runbooks and internal documentation that reduced customer onboarding time from 4+ weeks to approximately **10 days**.
- Contributed to the development of an internal ML platform by building **Python** feature pipelines and supporting their integration into customer environments.

SKILLS

Languages – Python, SQL, Java, R

ML/Data Science – scikit-learn, pandas, NumPy, SciPy, Machine Learning, Data Analytics, Statistical Analysis, Model Evaluation, Feature Engineering, RAG, LLM-based solutions

Cloud/DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, CI/CD, Jenkins, Git, Azure, Databricks, MLflow

Databases – PostgreSQL, MySQL, Oracle

Frameworks/Libraries – Spring Boot, FastAPI

Tools – Jira, Confluence, Splunk, Dynatrace, Power BI, Tableau, RStudio

PROJECTS

Customer Onboarding Playbook for ML Feature Store

- Worked directly with two pilot enterprise customers to design and ship a guided onboarding flow for an internal ML feature store, including SDK examples and debug tooling.
- Built a **Python CLI** to validate customer feature definitions against the platform schema before submission, catching **~70%** of schema errors at write time.
- Documented common integration patterns and ran follow-up workshops with customer data teams to upskill their internal engineers on the ML platform.

Fraud Detection Model on Transaction Features

- Engineered a feature pipeline in **Python** and **SQL** to extract behavioural signals from a transaction log of approximately 1.1M records.
- Trained a **LightGBM classifier** on the extracted features, tuning class weights to handle a 1:140 fraud imbalance and reaching **~0.91 AUC / 0.46 F1** on a held-out month.
- Packaged the model behind a **FastAPI** inference endpoint with input validation, achieving p95 latency around **180ms**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
