PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **Linux-based infrastructure** for edge computing environments, ensuring secure and reliable operation within enterprise customer settings.
- Developed automated deployment processes using **Python** and **Terraform** for managing distributed infrastructure, reducing manual configuration overhead by approximately **40%**.
- Integrated existing software services for deployment across distributed edge environments, focusing on seamless operation and minimal downtime during updates.
- Configured secure networking and connectivity solutions, establishing robust communication channels for edge devices and central platforms.
- Implemented comprehensive **monitoring** and **observability** solutions using tools like **Prometheus** and **Grafana** to track system performance and identify potential issues proactively.
- Collaborated with cloud and software engineers on technical design, contributing infrastructure expertise to ensure alignment between software requirements and platform capabilities.
- Managed production incidents for enterprise Java/.NET applications at HCL Technologies, performing root cause analysis and implementing fixes within strict SLA targets for P1/P2 issues.

SKILLS

Operating Systems – Linux, Bash, Shell Scripting

Cloud & IaC – AWS, GCP, Azure, Terraform

Programming & Scripting – Python, Java, Spring Boot

Networking & Security – Networking, Connectivity, Infrastructure Security

DevOps & Observability – CI/CD, Jenkins, Docker, Kubernetes, Prometheus, Grafana, Splunk, Dynatrace

Databases – PostgreSQL, MySQL, Oracle

PROJECTS

Edge Device Fleet Management Platform (HCL Technologies)

- Engineered a **Linux-based platform** to manage a fleet of 500+ edge devices, focusing on secure remote configuration and software deployment.
- Developed **Python** scripts to automate device onboarding, health checks, and firmware updates, decreasing deployment time by **30%**.
- Integrated **Terraform** for provisioning and managing the underlying cloud infrastructure (AWS EC2, S3) supporting the edge management services.

Secure Network Connectivity for Distributed Systems (HCL Technologies)

- Designed and implemented secure network configurations, including VPN tunnels and firewall rules, to connect distributed enterprise systems.
- Wrote **shell scripts** to automate network monitoring and alert generation, identifying connectivity disruptions within 15 minutes.
- Collaborated with operations teams to ensure system reliability and troubleshoot network-related incidents across production environments.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
