PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Provided first-line technical support via **phone**, **email**, and the **Service Management system**, resolving an average of 18 tickets daily.
- Troubleshot and diagnosed a wide range of **hardware**, **software**, and **network issues** for end-users, escalating complex problems to second-line support.
- Performed **desk-side troubleshooting** and resolution for issues related to **laptops**, **desktops**, and **printers** for new and existing employees.
- Managed IT equipment **inventory** and assisted with the setup, testing, and logging of new **hardware and software assets**.
- Collaborated with the IT support team to resolve complex issues and participated in IT projects, including the rollout of new systems.
- Participated in an **on-call rotation**, providing urgent IT support outside of regular working hours and ensuring business-critical flows remained operational.
- Maintained clear and concise communication with end-users, providing status updates on requests and incidents, ensuring a high level of **customer satisfaction**.

SKILLS

Support Tools – Service Management system, Ticketing System, Phone Support, Email Support

Hardware – Laptops, Desktops, Printers, IT Equipment

Software – Software Installation, Configuration, Updates, Troubleshooting

Operating Systems – Windows, macOS

Networking – Network Troubleshooting, System-Related Issues

IT Operations – Asset Management, Inventory Control, On-call Support, Escalation Procedures

Customer Service – End-User Support, Communication, Problem Solving

PROJECTS

Enterprise IT Support Workflow Automation

- Developed Python scripts to automate the process of logging and categorizing incoming support tickets, reducing manual entry time by approximately **30%**.
- Created shell scripts for routine system health checks and log analysis on Linux servers, proactively identifying potential issues before they impacted end-users.
- Documented standard operating procedures for common hardware and software installations, streamlining the onboarding process for new hires by an estimated **15%**.

IT Asset Management System Enhancement

- Designed and implemented a system for tracking IT equipment inventory using a combination of SQL (PostgreSQL) and Python scripting, improving data accuracy.
- Built automated reports using Python to reconcile software licenses against deployed assets, identifying potential compliance gaps for the IT operations team.
- Integrated the asset tracking system with the company's ticketing platform to automatically update asset information upon hardware replacement or assignment.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS
