PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Provided **first-line technical support** via phone, email, and ticketing system, resolving issues across **hardware, software, and network** for end-users.
- Recorded, classified, and prioritized over **150 support requests** per week using the company's **Service Management system**, ensuring timely resolution.
- Troubleshot and diagnosed a wide range of IT-related issues, escalating complex problems to second- and third-line support teams, reducing average resolution time by **18%**.
- Delivered hands-on technical support for end-user issues related to **laptops, desktops, printers, and phones**, performing hardware setups and replacements for new employees.
- Assisted with **software installations, configurations, and updates**, ensuring all devices adhered to company standards and security requirements.
- Managed IT equipment inventory, performing asset tracking and ensuring proper logging and management of **hardware and software assets**.
- Collaborated with IT support team members to resolve complex issues and improve overall IT service delivery, contributing to a **15% increase in customer satisfaction** scores.

SKILLS

IT Support – Service Desk, Ticketing System, Incident Management, Troubleshooting, Hardware Support, Software Support, Network Support, End-User Support

Operating Systems – Windows, Linux

Hardware – Laptops, Desktops, Printers, Mobile Devices, IT Equipment

Software – Microsoft 365, Application Installation, Configuration Management

Customer Service – Customer Satisfaction, Communication, Problem Solving, Collaboration

Asset Management – Inventory Tracking, Hardware Logging, Software Management

PROJECTS

Enterprise IT Support Process Improvement

- Analyzed ticket trends and user feedback from the HCL support desk to identify bottlenecks in incident resolution, proposing workflow enhancements.
- Developed and documented standardized troubleshooting guides for common hardware and software issues, reducing escalations by an estimated **20%** for the support team.
- Assisted in the implementation of a new ticketing system module, improving request tracking and enabling better SLA adherence for a team of **12 support engineers**.

End-User Device Onboarding Automation

- Designed a Python script to automate the initial setup and configuration of new employee laptops, integrating with Active Directory for user account provisioning.
- Streamlined the software deployment process for standard applications, reducing the manual setup time per device from **45 minutes to 15 minutes**.
- Contributed to the creation of user-facing documentation and quick-start guides for new hires, improving their initial IT experience.
