PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Configured and deployed **BGP** and **IS-IS routing** protocols across edge network routers for a global telecommunications client, enhancing route propagation efficiency by **15%**.
- Executed scheduled maintenance for production network infrastructure, including **software upgrades** on Cisco Nexus switches and **hardware replacements** on Juniper MX routers, maintaining **99.8%** service availability.
- Troubleshot and resolved routing and switching issues across complex **MPLS** and **RSVP-TE** environments, reducing P1 incident resolution time by **22%** through enhanced diagnostics.
- Collaborated with network architecture teams to integrate new **40G/100G Ethernet** technologies and **CWDM/DWDM optical transport** equipment into data center deployments, ensuring scalability for future traffic demands.
- Developed Python scripts to automate network device configuration validation and inventory management, reducing manual effort for a team of **8 engineers** by approximately **10 hours** per week.
- Maintained detailed as-built documentation and configuration records for **500+ network devices** across multiple production sites, improving audit trail accuracy and compliance adherence.
- Participated in a **24x7 on-call rotation**, responding to and resolving critical production network incidents, ensuring minimal disruption to global connectivity.

SKILLS

Networking Protocols – BGP, IS-IS, MPLS, RSVP-TE, VRRP, TCP/UDP, DHCP, DNS, IPv4, IPv6

Network Hardware – Cisco Nexus, Juniper MX, Optical Transport Equipment, CWDM, DWDM

Network Operations – Deployment, Configuration, Troubleshooting, Maintenance, Documentation, Asset Inventory

Automation & Scripting – Python, Bash

Cloud & Infrastructure – AWS, EC2, S3, Lambda, CloudWatch, Docker, Kubernetes

Observability & Monitoring – Splunk, Dynatrace

Databases & Data Tools – PostgreSQL, MySQL, Oracle, pandas, NumPy

PROJECTS

Global Network Deployment Automation (HCL Technologies)

- Engineered Python scripts to automate the deployment and validation of **network configurations** for edge routers, supporting a multi-vendor environment.
- Integrated automation scripts with **Jenkins CI/CD pipelines** to streamline the rollout of software updates and configuration changes across **200+ network devices**.
- Reduced manual configuration errors by **30%** and accelerated deployment timelines by an average of **2 days** per site for new network infrastructure.

Production Network Monitoring Enhancement (HCL Technologies)

- Developed custom dashboards and alerts in **Splunk** to monitor key network performance indicators for a financial services operations dashboard, focusing on **MPLS** and **BGP** status.
- Implemented automated log parsing scripts in Python to identify and categorize network incidents, reducing the mean time to detect (MTTD) by **25%**.
- Collaborated with operations teams to refine alert thresholds, decreasing alert fatigue by approximately **18%** while maintaining critical event visibility.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
