PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained **Python** tooling solutions to automate the management of production fleet health and critical business processes for enterprise customers.
- Diagnosed and resolved system failures by performing root cause analysis, collaborating with **Production Engineering** and cross-functional teams to deliver timely solutions.
- Proactively identified and implemented enhancements to tooling, hardware, and operational processes, improving overall system stability and performance.
- Built subject matter expertise in **Firmware Deployment** and **Edge/CDN hardware** management across a fleet of millions of servers.
- Crafted clear and concise technical reports and documentation for a broad range of stakeholders, including senior management and operational teams.
- Collaborated effectively across organization boundaries with **Hardware Designers**, **Manufacturers**, and **Datacenter Operations** teams to ensure smooth system operation.
- Containerized production services using **Docker** and deployed to **AWS EC2** instances, ensuring efficient resource utilization and consistent environments.

SKILLS

Languages – Python, Java, SQL, PHP, Go, Rust, C++

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Linux, Shell Scripting, Jenkins, Git

System Management – Production Services, Fleet Management, Server Architecture, Firmware Deployment, Diagnostic Testing, Configuration Management

Troubleshooting & Analysis – Root Cause Analysis, System Failures, Scientific Troubleshooting, Log Analysis, Data Validation

Collaboration & Reporting – Cross-functional Collaboration, Stakeholder Reporting, Requirements Gathering, Agile Methodologies

PROJECTS

Production Fleet Health Monitoring Tool

- Engineered a **Python**-based application to monitor the health of a large-scale production fleet, integrating with **AWS CloudWatch** for real-time metric collection.
- Developed automated diagnostic scripts that reduced manual troubleshooting time for common system failures by approximately **40%**.
- Designed and implemented alerting mechanisms that reduced the mean time to detect critical incidents by **22%**.

Automated Server Configuration Deployment

- Built a **Python** scripting framework to automate the deployment of server configurations across thousands of nodes in a distributed environment.
- Integrated the framework with **Jenkins** for CI/CD pipeline execution, enabling consistent and repeatable deployments.
- Managed system configurations and applied updates using **Linux** shell scripting and cron jobs for scheduled tasks.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
