HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and trained **gradient-boosted classifiers** using **scikit-learn** on a **~280k-row** labelled transactions dataset to identify suspicious activity, achieving an **AUC of ~0.86** on held-out data.
- Designed and implemented **Python** feature pipelines on **AWS Lambda** and **S3** to support downstream ML scoring, processing approximately **3,500 events/sec** during peak hours and replacing a less efficient batch job.
- Engineered **Java Spring Boot** REST APIs for inter-service communication, incorporating request validation and circuit-breaker patterns to ensure system resilience.
- Built and deployed **Power BI** dashboards that visualized audience segments and campaign performance metrics for marketing stakeholders, enabling data-informed decision-making.
- Collaborated with marketing and sales teams to gather requirements for analytical solutions, translating business needs into technical specifications for model development and reporting.
- Containerized **Java** applications using **Docker** and deployed them to **AWS EKS**, configuring basic resource limits and enabling predictable rollouts.
- Wrote production runbooks and internal documentation that streamlined the customer onboarding process, reducing the time-to-deployment from over 4 weeks to approximately 10 days.

SKILLS

Programming Languages – Python, SQL, Java, R

Cloud Platforms – AWS (SageMaker, Lambda, S3, EC2, CloudWatch), Azure Machine Learning, Databricks

Machine Learning – AI/ML models, customer segmentation, propensity modelling, predictive analytics, lead scoring, scikit-learn, gradient boosting, model evaluation

Data Visualization & BI – Power BI, Tableau, DAX, Power Query

Databases & Data Warehousing – PostgreSQL, MySQL, Oracle, SQL, data modelling, analytical datasets

Tools & Technologies – Docker, Kubernetes, Jenkins, Git, Jira, Confluence, Splunk, Dynatrace, Linux, shell scripting, FASTAPI, Spring Boot

PROJECTS

Customer Segmentation Models for Financial Services

- Developed predictive models using **Python** and **scikit-learn** to segment customers based on transactional data and engagement patterns, achieving **~0.82 AUC** for a churn prediction model.
- Engineered scalable analytical datasets from diverse financial services sources using **SQL** and **Pandas**, supporting downstream model training and reporting.
- Collaborated with business analysts to define segmentation criteria and validate model outputs, ensuring alignment with marketing campaign objectives.

Marketing Campaign Performance Dashboard

- Designed and implemented interactive dashboards in **Power BI** to track key performance indicators for marketing campaigns, including audience engagement, conversion rates, and ROI.
- Extracted, transformed, and loaded data from multiple sources using **Power Query** and **DAX** to create a unified dataset for analysis and visualization.
- Presented dashboard findings and actionable insights to marketing and distribution teams, facilitating data-driven adjustments to campaign strategies.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
