PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and deployed **Python**-based AI agent services, integrating with **Azure AI Foundry** to manage agent lifecycles and secure communications.
- Fine-tuned **large language models** using **Python** and **scikit-learn** on customer interaction datasets to improve response accuracy, achieving a **15%** reduction in irrelevant outputs.
- Implemented and optimized **inference pipelines** for AI models, reducing average latency by **30%** and improving cost efficiency on **Azure** infrastructure.
- Applied **prompt engineering** techniques to refine LLM outputs for agent-based workflows, enhancing conversational flow and task completion rates for enterprise users.
- Collaborated with product and design teams to integrate AI agent functionalities into the **React**-based user experience across the **M365** ecosystem.
- Containerized AI services using **Docker** and deployed them to **Azure Kubernetes Service (AKS)**, ensuring scalable and reliable production environments.
- Wrote clean, maintainable **Python** code for model evaluation and data processing, adhering to **Agile** methodologies and participating in code reviews.

SKILLS

AI/ML – Large Language Models (LLMs), Deep Learning, Model Training, Model Evaluation, Inference Pipelines, Prompt Engineering, AI Agents, Azure AI Foundry, LangChain, RAG

Programming Languages – Python, Java, C++, C#, JavaScript, C

Cloud Platforms – Azure, Azure Kubernetes Service (AKS), AWS, GCP

Web Technologies – React, REST APIs

Databases – PostgreSQL, MySQL, Oracle

Tools & Methodologies – Docker, Git, Jenkins, Jira, Confluence, Agile, Scrum, Linux, Shell Scripting

PROJECTS

Enterprise AI Agent Orchestration Service

- Built a **Python** microservice using **FastAPI** to manage the lifecycle of AI agents, handling registration, configuration, and secure communication channels.
- Integrated with **Azure AI Foundry** services for model deployment and orchestration, enabling agents to access and utilize various LLMs for task execution.
- Implemented robust error handling and logging mechanisms, reducing critical agent failures by **22%** and providing detailed operational insights via **Azure Monitor**.

Customer Interaction Analysis & LLM Fine-Tuning

- Engineered **Python** data pipelines using **pandas** and **NumPy** to clean and preprocess large volumes of customer interaction logs (approx. **500k** records).
- Fine-tuned a transformer-based LLM on the processed data to improve its understanding of domain-specific language, enhancing its performance in generating relevant responses.
- Evaluated model performance using metrics such as perplexity and accuracy, achieving a **12%** improvement in response relevance on a held-out test set.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
