PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Drove Azure Consumed Revenue (ACR) growth for non-profit accounts in the DACH market, exceeding quarterly targets by an average of **15%** through proactive pipeline generation and opportunity acceleration.
- Shaped and architected **AI-powered Azure solutions** for mental healthcare and elderly care providers, translating complex operational challenges into practical, responsible cloud implementations.
- Led envisioning workshops and technical demonstrations for CIOs and CTOs, articulating the business value of **Azure AI services** and application modernization to secure buy-in and drive adoption.
- Collaborated with Account Executives to develop and execute territory plans, identifying high-growth areas and prioritizing customer engagements for maximum impact on Azure ACR and new workload adoption.
- Developed and delivered technical roadmaps and governance frameworks for customers transitioning to production-grade **Azure and AI environments**, ensuring secure, scalable, and compliant deployments.
- Engaged with customer innovation leads to explore and integrate emerging technologies, including **GitHub Copilot** and agent-based solutions, to enhance care delivery and operational efficiency.
- Containerized backend services using **Docker** and managed deployments on **AWS EC2** instances, ensuring reliable operation and facilitating smoother release cycles within the HCL development team.

SKILLS

Cloud Platform – Azure, AWS, EC2, S3, Lambda, CloudWatch

AI & Machine Learning – Azure AI services, Azure OpenAI, AI solutions, Responsible AI, AI deployment, Machine learning fundamentals

Sales & Business Development – Solution sales cycle, Pipeline generation, Account planning, Demand generation, Business acumen, Commercial curiosity

Technical Skills – Solution architecture, Application modernisation, Cloud-native architectures, Data platform, Technical conversations, Roadmaps, Governance frameworks

Tools & Methodologies – GitHub Copilot, Docker, Agile, Scrum, Jenkins, Git, Jira, Confluence

PROJECTS

Azure Cloud & AI Solutions for Social Good

- Designed and presented a proof-of-concept solution leveraging **Azure AI services** for a hypothetical elderly care provider to automate patient intake processes, reducing manual data entry by an estimated **40%**.
- Developed technical roadmaps for migrating legacy operational systems to **Azure cloud-native architectures**, focusing on scalability and cost optimization for non-profit organizations with tight budgets.
- Provided pre-sales technical consultation on the responsible implementation of AI solutions, addressing data privacy and governance concerns with customer stakeholders.

Enterprise Application Modernisation with Cloud Services

- Re-architected a core Java Spring Boot service to leverage **AWS Lambda and API Gateway** for improved scalability and reduced operational overhead, handling approximately **1,500 requests per minute**.
- Implemented CI/CD pipelines using **Jenkins and Docker** to automate the build, test, and deployment process for backend microservices, reducing deployment time by **30%**.
- Supported production environments running on **Linux servers**, monitoring application performance and responding to critical incidents to maintain service availability.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
