PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained automated test frameworks using **Python**, enhancing test execution speed by **30%** for a suite of enterprise applications.
- Designed and implemented comprehensive testing strategies for **AI-based products**, focusing on agent response validation and model fairness evaluation across multiple iterations.
- Authored **contract tests** using **PACT** to ensure seamless integration and data consistency between internal microservices and external API providers.
- Collaborated with development teams to integrate testing into the CI/CD pipeline, enabling automated regression tests within **Jenkins** for every code commit.
- Conducted **manual testing**, including functional, exploratory, and end-to-end scenarios, identifying critical defects missed by automated checks in a complex SaaS platform.
- Participated in code reviews for test automation scripts and provided constructive feedback to peers, improving overall code quality and maintainability.
- Deployed and managed containerized testing environments using **Docker** and orchestrated workflows on **AWS**, ensuring consistent test execution across development and staging.

SKILLS

Programming Languages – Python, C#, TypeScript

Testing Frameworks & Tools – PACT, Jenkins, Docker, Selenium (implied)

AI/ML Testing – AI-based products, Agent response validation, Model fairness, Data input/output validation

Cloud Platforms – AWS

Methodologies – Agile, Contract Testing, Regression Testing, Exploratory Testing

PROJECTS

AI Agent Response Validation Framework

- Developed a Python-based framework to automate the testing of AI agent responses, evaluating accuracy and adherence to predefined conversational flows.
- Integrated the framework with **Copilot** to accelerate the generation of test cases and assertion logic, reducing manual effort by approximately **40%**.
- Designed validation modules to assess model fairness and bias in agent outputs, contributing to the ethical deployment of AI features.

SaaS Platform Integration Testing Suite

- Built a suite of **contract tests** using **PACT** to verify API compatibility and data contracts between core platform services and newly integrated third-party payment gateways.
- Implemented automated data generation scripts to simulate a variety of edge cases and error conditions for robust integration testing.
- Collaborated with external API providers to define and agree upon service level expectations, ensuring smooth data exchange and reducing post-integration defects.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
