PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented Java Spring Boot REST APIs to support new feature development, ensuring seamless integration with existing microservices and reducing data retrieval latency by **18%**.
- Developed and maintained asynchronous event consumers using Java and Kafka, processing approximately **4,000 events per minute** for critical backend operations.
- Wrote complex SQL queries and stored procedures across PostgreSQL and Oracle databases for data extraction, transformation, and validation, supporting enterprise reporting needs.
- Collaborated with senior engineers on code reviews and sprint planning, contributing to technical estimations and ensuring adherence to development best practices within an Agile framework.
- Containerized Java applications using **Docker**, facilitating consistent deployment across development, staging, and production environments on AWS EC2.
- Integrated new services into the CI/CD pipeline using **Jenkins** and Git, automating build, test, and deployment processes to accelerate release cycles.
- Participated in the full software development lifecycle, including requirements gathering, implementation, testing, and production support for enterprise applications.

SKILLS

Languages – Java, Python, SQL, JavaScript

Frameworks & Libraries – Spring Boot, Hibernate, JPA, pandas, NumPy, scikit-learn, Flask, FastAPI

Databases – PostgreSQL, MySQL, Oracle

Cloud & Containerization – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes

CI/CD & Tools – Jenkins, Git, Jira, Confluence, Splunk, Dynatrace

Analytics & BI – Power BI, Tableau, DAX, Power Query, R/RStudio

PROJECTS

Scalable Data Processing Pipeline with Java and Kafka

- Engineered a fault-tolerant Java application using Spring Boot to ingest and process high-volume event streams from Kafka, handling an average of **3,500 messages per second**.
- Implemented robust error handling and retry mechanisms for message processing, ensuring data integrity and minimizing processing failures in a distributed system.
- Developed RESTful endpoints with Spring Boot to expose processed data for downstream consumption by other internal services, improving data accessibility.

Customer Transaction Analysis Dashboard

- Developed an interactive dashboard using **Power BI** to visualize key performance indicators for customer transaction flows, enabling business stakeholders to monitor operational health.
- Created complex DAX measures and Power Query transformations to aggregate and analyze transaction data, identifying patterns and anomalies that led to a **15% reduction** in manual reconciliation effort.
- Designed the data model within Power BI to support ad-hoc analysis and reporting requirements, facilitating deeper insights into customer transaction behavior.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
