HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** microservices, implementing RESTful APIs for inter-service communication and data exchange, handling approximately 1,500 requests per minute.
- Integrated a new data persistence layer using **JPA and Hibernate**, optimizing database interactions and reducing query execution times by 18% for core application modules.
- Authored unit tests and integration tests using **JUnit and Mockito**, achieving over 85% code coverage for critical Java components and ensuring system stability.
- Collaborated within an Agile team to refine user stories and provide technical estimations for new feature development sprints, contributing to the timely delivery of project milestones.
- Participated in code reviews for junior engineers, offering constructive feedback on design patterns and adherence to coding standards to improve overall code quality.
- Gained exposure to **NoSQL database concepts** through integration efforts with a document-based data store for specific application features.
- Containerized backend services using **Docker** and deployed them to **AWS EC2** instances, managing configurations and ensuring smooth application rollouts via Jenkins pipelines.

SKILLS

Languages – Java, Python, SQL, R, JavaScript

Frameworks & Libraries – Spring Boot, Hibernate, JPA, Spring, JUnit, Mockito, pandas, NumPy, scikit-learn, Flask, FastAPI, React, Angular

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Databases – PostgreSQL, MySQL, Oracle, NoSQL

Tools & Technologies – Docker, Kubernetes, Jenkins, Git, Jira, Confluence, Splunk, Dynatrace

Data & Analytics – Power BI, Tableau, DAX, Power Query, Data Modelling, ETL, Data Warehousing, Statistical Analysis, Machine Learning Fundamentals

PROJECTS

Enterprise Java API Gateway Refactor

- Re-architected a monolithic Java API gateway into a microservices-based system using **Spring Boot**, improving request routing efficiency by 22%.
- Implemented robust error handling and circuit breaker patterns with **Spring Cloud Netflix**, enhancing system resilience for critical API endpoints.
- Migrated data access logic to utilize **Hibernate** for improved ORM capabilities and performance tuning across multiple data sources.

Python-based Data Aggregation Service

- Developed a **Python** service using **Flask** to aggregate data from disparate sources, processing approximately 5,000 records daily for reporting.
- Engineered data transformation pipelines using **pandas** to clean and structure raw data before loading into a PostgreSQL database.
- Integrated the service with **AWS S3** for storing aggregated data outputs, ensuring efficient data lifecycle management.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
