HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed, implemented, and maintained **Java Spring Boot** backend services and REST APIs for enterprise applications, ensuring robust data exchange between interconnected systems.
- Developed and optimized **Hibernate** queries and persistence layers, managing complex relational data models across **PostgreSQL** and **Oracle** databases to support core business functions.
- Engineered **JUnit** and **Mockito** test suites for Java applications, achieving over 85% code coverage and significantly reducing regression defects during release cycles.
- Contributed to the design and development of scalable distributed services on **Kubernetes**, focusing on high availability and efficient failure handling within data streaming platforms.
- Investigated production issues across high-throughput telemetry pipelines using **metrics**, **logs**, and **flame graphs**, contributing to root cause analysis and implementing preventative measures.
- Participated in a **24/7 on-call rotation**, responding to critical incidents, performing escalations, and collaborating with support teams to restore service quickly.
- Managed the development and release lifecycle for backend services on **Kubernetes** using **GitOps** principles and tools like Argo CD, ensuring predictable deployments and rollbacks.

SKILLS

Languages – Java, Python, SQL, R

Frameworks/Libraries – Spring Boot, Hibernate, Spring Cloud, JUnit, Mockito, pandas, NumPy, scikit-learn, FastAPI, Flask

Data Streaming/Processing – Kafka-compatible streaming platforms, Apache Flink, event-driven systems, data pipelines, ETL

Databases – PostgreSQL, MySQL, Oracle

Cloud/Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Kubernetes, Docker, GitOps, Argo CD, Linux

Observability/SRE – Splunk, Dynatrace, CloudWatch, P1/P2 incident response, SLA management, on-call rotation, profilers, flame graphs

BI/Analytics – Power BI, Tableau, DAX, Power Query, data modelling

PROJECTS

Distributed Telemetry Ingestion Platform (HCL Technologies)

- Engineered a **high-throughput data ingestion** pipeline using **Java Spring Boot** and a **Kafka-compatible streaming platform** to process millions of telemetry events daily.
- Developed real-time transformation logic within **Apache Flink** jobs to enrich and route incoming data streams to various downstream storage solutions, ensuring data integrity.
- Containerized services using **Docker** and deployed them to **Kubernetes** clusters, implementing basic resource management and health checks for enhanced reliability.

Real-time Transaction Monitoring Service (HCL Technologies)

- Built a **Java Spring Boot** microservice to monitor financial transaction flows, parsing messages and identifying anomalies for operational alerting.
- Implemented asynchronous processing with **JPA** and **PostgreSQL** to handle large volumes of transaction data, ensuring timely updates and audit trails.
- Integrated with monitoring tools like **Splunk** to provide visibility into system performance and error rates, supporting incident response.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
