PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and deployed **production-ready C++ code** for core MongoDB Server features, contributing to the next major release.
- Authored comprehensive **unit and integration tests** in C++ and Javascript to ensure code correctness and prevent regressions.
- Investigated and resolved **customer-reported issues** and testing-reported bugs within the MongoDB Server, improving overall stability.
- Led the design and implementation of a medium-sized project focused on enhancing the **MongoDB Server's programmability features**, managing the full project lifecycle.
- Collaborated with cross-team stakeholders to gather requirements, design solutions, and deliver new features for the Server Programmability team.
- Performed **code reviews** for junior engineers and contributed to design discussions for upcoming features, ensuring adherence to team standards.
- Containerized server components using **Docker** and deployed to a managed **Kubernetes** cluster on AWS, configuring basic resource limits for stable operation.

SKILLS

Languages – C++, Rust, Python, Java, Javascript, SQL

Core Concepts – Systems Programming, Operating Systems, Algorithms, Data Structures, Software Design, Distributed Systems, Performance Tuning, Agile Methodologies

Tools & Platforms – MongoDB Server, Docker, Kubernetes, AWS, Jenkins, Git, Jira, Confluence, Splunk, Dynatrace

Databases – PostgreSQL, MySQL, Oracle

Scripting & Automation – Python, Shell Scripting

PROJECTS

C++ Runtime Performance Enhancements

- Engineered performance optimizations within a core C++ runtime library for an enterprise application, reducing average execution time by **18%**.
- Developed a suite of **performance regression tests** using Python to monitor latency and resource utilization across key operations.
- Collaborated with the platform team to integrate the updated library, ensuring seamless deployment across staging and production environments.

Internal Developer Tooling for C++ Development

- Built a Python-based command-line tool to automate the generation of boilerplate code for new C++ modules, reducing manual effort by approximately **4 hours per developer per week**.
- Integrated the tool with the team's Git repository and CI pipeline, enabling automatic code quality checks and test execution.
- Provided training and documentation for the tool to 5 engineers on the team, facilitating adoption and increasing development velocity.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
