PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Provided high-quality online technical support to enterprise customers via a **ticketing system**, handling an average of **25 support requests** per week.
- Investigated and troubleshot technical issues across **web-based applications**, reproducing reported problems to distinguish between user, configuration, and software defects.
- Managed support tickets from initial contact through resolution, documenting investigation steps, findings, and resolutions within the **support platform**, ensuring clear communication with customers.
- Gathered diagnostic information, including **application logs** and screenshots, to assist engineering teams in identifying root causes for complex issues.
- Prioritized support requests based on severity and customer impact, monitoring outstanding tickets to ensure timely follow-up and adherence to **agreed service levels**.
- Created and maintained **FAQs and troubleshooting guides**, contributing to a self-service knowledge base that deflected **15% of common inquiries**.
- Collaborated with **software development and engineering teams** to identify recurring issues and provide feedback for product improvements, improving issue resolution time by **10%**.

SKILLS

Support Tools – Ticketing systems, Jira, Zendesk, Freshdesk, Intercom

Technical Skills – REST APIs, Postman, SQL, JSON, Application logs, System integrations

Cloud Platforms – SaaS, Cloud-based platforms, AWS

Problem Solving – Troubleshooting, Logical investigation, Methodical approach, Documentation

Communication – Written and spoken English, Customer communication, Technical explanation

PROJECTS

Customer Issue Triage and Documentation Platform

- Developed a Python-based internal tool to categorize and prioritize incoming customer support tickets, integrating with a **ticketing system API** to automate initial triage.
- Implemented logging mechanisms to capture detailed diagnostic information for escalated issues, creating a centralized repository for **application logs** and system data.
- Designed and documented standardized procedures for reproducing common customer-reported bugs, reducing the average time spent on initial issue validation by **20%**.

Enterprise Application Support Dashboard Enhancement

- Enhanced an existing **Java Spring Boot** application support dashboard by adding new API endpoints to fetch real-time system health metrics from **AWS CloudWatch**.
- Refactored SQL queries used for data retrieval in the dashboard, improving performance and enabling the display of **transaction monitoring** data for over 5,000 daily events.
- Collaborated with operations teams to define requirements for new alerting rules, contributing to a reduction in critical incident response time by approximately **15%**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
