HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **Java Spring Boot** REST APIs for new communication features on the ASTRO Android platform, processing over 500 requests per second during peak testing.
- Developed and maintained **Hibernate** ORM mappings and optimized SQL queries for the application's persistence layer, reducing average data retrieval times by 18%.
- Wrote comprehensive **JUnit** and **Mockito** tests for core Java modules, increasing unit test coverage by 30% and identifying critical race conditions before integration.
- Participated in **Agile/Scrum** ceremonies, including sprint planning and technical estimation, contributing to the successful delivery of two major feature releases.
- Debugged and resolved complex **Android device software defects** identified during system testing, collaborating with cross-functional teams to diagnose root causes.
- Created and executed **unit, integration, and system tests** for new two-way radio product features, meticulously analysing results and reporting detected issues.
- Containerized application services using **Docker** and deployed them to an **AWS EC2** environment, ensuring consistent build and runtime configurations.

SKILLS

Languages – Java, Python, SQL, Shell Scripting, HTML, JavaScript

Frameworks/Libraries – Spring Boot, Hibernate, JPA, JUnit, Mockito, pandas, NumPy, scikit-learn, Flask, FastAPI

Cloud/Infra – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Jenkins

Databases – PostgreSQL, MySQL, Oracle

Tools/Platforms – Jira, Confluence, Git, Splunk, Dynatrace, Android Debug Bridge (ADB), Power BI, Tableau

Methodologies – Agile, Scrum, CI/CD

PROJECTS

ASTRO Android Platform Feature Development

- Engineered new communication features for mission-critical two-way radios using **Java Spring Boot**, focusing on real-time data exchange and low-latency responses.
- Integrated **Android Debug Bridge (ADB)** commands into Python scripts to automate device testing workflows, reducing manual testing time by approximately 40%.
- Implemented robust error handling and logging mechanisms using **AWS CloudWatch** to monitor application health and facilitate rapid issue diagnosis.

Embedded Systems Test Automation Framework

- Developed a Python-based framework to automate the execution of test cases against embedded communication devices, simulating over 15 distinct operational scenarios.
- Designed and implemented a RESTful API using **FastAPI** to control test execution and retrieve results from the automation framework, enabling integration with CI/CD pipelines.
- Managed test case execution and defect tracking using **Jira**, ensuring clear communication of bugs and progress to the development and QA teams.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
