PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** REST APIs for cross-service data exchange, implementing request validation and circuit-breaker patterns to ensure system resilience.
- Engineered **Python scripts** to automate data extraction and transformation tasks for financial reporting, processing approximately **1.5 TB** of data weekly.
- Designed and implemented **Hibernate** mappings and queries for a core enterprise application module, ensuring efficient data persistence and retrieval across the relational database.
- Contributed to **model training** and validation activities for an internal fraud detection initiative, achieving a **0.88 AUC** on a held-out dataset.
- Collaborated with **Data Scientists** and **Business Stakeholders** to define requirements and deliver AI-driven project features, facilitating integration with existing enterprise systems.
- Assisted with prompt engineering and the implementation of **large language models (LLMs)** for internal documentation summarization tasks, improving information retrieval efficiency.
- Containerized microservices using **Docker** and deployed them to an **AWS EKS** cluster, managing configurations via **Helm** charts and monitoring resource utilization.

SKILLS

Programming Languages – Python, Java, SQL, R

Frameworks & Libraries – Spring Boot, Hibernate, pandas, NumPy, scikit-learn, FastAPI, Flask, LangChain

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch, EKS)

Databases – PostgreSQL, MySQL, Oracle

AI/ML – Machine Learning, Data Analytics, Generative AI, LLM, Prompt Engineering, Model Training, Model Evaluation

Tools & Technologies – Docker, Kubernetes, Jenkins, Git, Jira, Splunk, Dynatrace, Linux, Power BI, Tableau

PROJECTS

AI-Powered Transaction Anomaly Detection

- Developed a **Python**-based feature pipeline to extract behavioural signals from a transaction log of approximately **800,000 records**.
- Trained a **LightGBM classifier** on the extracted features, tuning class weights to address class imbalance and achieving an **0.92 AUC** and **0.48 F1 score** on a held-out month.
- Packaged the trained model behind a **FastAPI** inference endpoint with input validation, achieving a p95 latency of **190ms** and implementing feature-drift logging.

Customer Onboarding Automation for ML Platform

- Built a **Python CLI** tool to validate customer feature definitions against the platform schema before submission, catching approximately **65%** of schema errors at write time.
- Designed and shipped **REST APIs** in **Java Spring Boot** for cross-service data exchange between the feature store and consumer applications, enabling streamlined customer integration.
- Documented common integration patterns and conducted technical walkthroughs with client data teams to upskill their engineers on platform adoption.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
