PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Provided senior technical oversight for geometric design of transport schemes, including horizontal and vertical alignment and junction layouts, ensuring coordination with drainage and structural constraints.
- Managed project and portfolio performance, including risk, change, resourcing, and cash flow, identifying and implementing corrective actions to maintain budget adherence and quality standards.
- Led resource planning across project pipelines, coordinating with the recruitment team to secure necessary appointments and ensure team capacity aligned with financial needs.
- Developed and maintained trusted client and partner relationships, identifying emerging needs and supporting the conversion of opportunities into viable commissions.
- Oversaw the financial management of projects, including fee and budget control, cash-flow forecasting, and invoice coordination in collaboration with finance departments.
- Contributed to the planning, design, and delivery of transportation and civil infrastructure projects through all stages of the project lifecycle.
- Containerised and deployed backend services using **Docker** and **AWS EC2**, configuring **Jenkins** pipelines for automated builds and deployments to production environments.

SKILLS

Transportation Engineering – Geometric Design, Pavement Design, Active Travel Integration, Public Realm, Rail, Ports, Roads, Infrastructure Projects

Project Management – Scope, Programme, Budget, Quality, Commercial Objectives, Resource Planning, Financial Management, Risk Management, Change Management

Client & Stakeholder Management – Client Relationships, Partner Relationships, Business Development, Opportunity Identification, Commission Conversion

Software & Tools – Java, Spring Boot, Python, SQL, PostgreSQL, AWS, Docker, Jenkins, Jira, Confluence, Splunk, Dynatrace

Data Analysis & BI – Power BI, Tableau, DAX, Power Query, Data Modelling, R, pandas, NumPy

PROJECTS

Transportation Infrastructure Project Delivery Framework

- Developed a comprehensive project delivery framework for transportation infrastructure, incorporating best practices in technical leadership, design review, and quality assurance.
- Integrated resource planning and financial tracking mechanisms into the framework, enabling better capacity management and budget adherence across multiple projects.
- Defined client engagement protocols and stakeholder management strategies to foster trusted relationships and support business development initiatives.

Automated Reporting for Civil Engineering Projects

- Engineered Python scripts to automate the generation of weekly progress reports for civil engineering projects, consolidating data from multiple sources including project management tools and financial systems.
- Developed data pipelines using **pandas** and **SQL** to extract and transform project metrics, reducing manual reporting effort by approximately **40%**.
- Built interactive dashboards in **Power BI** to visualise key performance indicators, providing stakeholders with clear insights into project status, budget utilisation, and resource allocation.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
