HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **Python** scripts to automate data extraction and transformation tasks, reducing manual processing time by **~30%** for weekly operational reports.
- Developed and maintained **Java Spring Boot** REST APIs for inter-service communication, ensuring seamless data flow between internal applications.
- Contributed to the development of a **payments operations dashboard** by implementing transaction monitoring features and enhancing alerting mechanisms for failed payment messages.
- Managed production support for enterprise applications, including incident response, root cause analysis, and SLA adherence using **Splunk** and **Dynatrace**.
- Authored **Python** code for data pipeline construction, integrating disparate data sources into a unified format for downstream analytics.
- Investigated and debugged complex issues across distributed systems, collaborating with cross-functional teams to achieve timely resolutions.
- Containerized microservices using **Docker** and deployed them to **AWS EC2** instances, streamlining the application deployment process.

SKILLS

AI/ML Research – LLM benchmarking, model evaluation, adversarial testing, synthetic data generation, research methodologies, reinforcement learning, AI safety

Programming Languages – Python, Java, SQL, R

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn, Flask, FastAPI, React, Angular

Cloud & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Linux, Git, Jenkins

Databases – PostgreSQL, MySQL, Oracle

Tools & Observability – Splunk, Dynatrace, Jira, Confluence

Data Analytics & BI – Power BI, Tableau, DAX, Power Query, data modelling, statistical analysis

PROJECTS

LLM Evaluation Framework for Model Behavior Analysis

- Developed a **Python**-based framework to systematically evaluate frontier LLMs across diverse tasks, focusing on identifying behavioral anomalies and failure modes.
- Designed and implemented a suite of challenging benchmark datasets to probe model reasoning capabilities, comparing performance metrics across models like **Llama** and **Gemini**.
- Integrated adversarial testing scenarios to uncover model vulnerabilities, contributing to a more comprehensive understanding of model reliability and safety through rigorous experimentation.

Synthetic Data Generation for Model Training

- Engineered **Python** scripts to generate synthetic transaction data for training and evaluating predictive models, focusing on edge cases not present in historical logs.
- Applied statistical methods and simulation techniques to create realistic data distributions that mimic real-world scenarios, aiming to improve model generalization.
- Cleaned and preprocessed generated datasets using **pandas**, preparing them for ingestion into downstream machine learning pipelines.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
