HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Developed and optimized **Java Spring Boot** REST APIs for enterprise applications, handling approximately **4,500 requests per minute** during peak loads.
- Implemented **Hibernate** and JPA entities for data persistence layer operations, ensuring efficient data retrieval and management across relational databases.
- Designed and implemented **JUnit** test suites for core Java components, increasing code coverage by **18%** and reducing post-deployment defects.
- Assisted in the development and optimization of **cloud-deployed JVM applications**, contributing to features that improved system responsiveness.
- Participated in **code reviews**, providing constructive feedback to peers to maintain high standards of code quality and adherence to best practices.
- Supported the development of new functionalities by translating **product requirements** into technical specifications and implementation tasks within agile sprints.
- Containerized Java applications using **Docker** and managed deployments on **AWS EC2** instances, streamlining the build and deployment lifecycle.

SKILLS

Languages – Java, Python, SQL, Scala

Frameworks/Libraries – Spring Boot, Hibernate, JPA, JUnit, pandas, NumPy, scikit-learn

Cloud/DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle

Tools/Platforms – Splunk, Dynatrace, Jira, Confluence

Concepts – Object-Oriented Programming, REST APIs, Agile Methodologies, System Design Principles, Functional Programming Concepts

PROJECTS

Enterprise Java Application Performance Enhancement

- Optimized critical **Java Spring Boot** services by refactoring inefficient query patterns and implementing caching strategies, reducing average API response times by **30%**.
- Implemented robust error handling and logging mechanisms using **JPA** and Hibernate, which improved the traceability of issues in production environments.
- Developed comprehensive **JUnit** and Mockito tests for new API endpoints, ensuring functional correctness and preventing regressions before deployment.

Python-Based Data Processing Pipeline

- Developed Python scripts to automate data extraction, transformation, and loading (ETL) processes from disparate sources into a central repository, processing approximately **50 GB** of data daily.
- Utilized **pandas** and NumPy for data manipulation and analysis, generating scheduled reports that provided key operational insights to business stakeholders.
- Containerized the Python data processing application using **Docker** for consistent execution across development and production environments.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
