HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Designed and implemented **AI agents** and intelligent automation tooling for cyber threat detection using Python and Azure ML services.
- Automated cloud deployments for **Azure infrastructure**, including network, storage, and compute resources, leveraging **Terraform** for Infrastructure as Code.
- Engineered scalable **log ingestion pipelines** on Azure Monitor and Log Analytics, migrating data from diverse security sources for enhanced threat analysis.
- Drove adoption of **Infrastructure as Code (IaC)** frameworks, developing and managing **Terraform** modules to provision and configure Azure environments.
- Implemented **CI/CD pipelines** using Azure DevOps for automated deployment, testing, and management of cloud infrastructure, reducing deployment times by **40%**.
- Mentored junior engineers on **Azure best practices**, IaC principles, and secure cloud architecture design, improving team code quality and consistency.
- Designed and implemented **security policies** within Azure using Azure Security Center and Key Vault, ensuring adherence to governance standards and mitigating risks.

SKILLS

Cloud Platform – Azure, Azure Monitor, Azure Security Center, Key Vault, AKS, Azure DevOps

Infrastructure as Code – Terraform, ARM Templates

Automation & Scripting – Python, Ansible

Containerization – Docker, Kubernetes

Programming Languages – Java, Python

Databases – PostgreSQL, MySQL, Oracle

Development Tools – Git, Jenkins, Jira, Confluence

PROJECTS

Azure Security Automation Framework

- Developed an **Azure automation framework** using Python and **Terraform** to deploy and manage security controls across multiple environments.
- Implemented automated log ingestion and analysis for security events from various Azure services, enabling faster threat detection and response.
- Integrated **Azure Security Center** recommendations into automated remediation playbooks, reducing manual intervention for common security findings by **60%**.

AI-Enabled Threat Intelligence Platform

- Built an **AI agent** using Python and Azure ML to analyze threat intelligence feeds and identify potential security risks.
- Designed and implemented data pipelines for ingesting and processing large volumes of unstructured threat data, preparing it for AI model consumption.
- Developed a **CI/CD pipeline** for the AI agent, enabling rapid deployment and iteration of new threat detection models on Azure.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
