PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Provided day-to-day technical support for enterprise vulnerability management platforms, troubleshooting scanning infrastructure, connectivity issues, and authentication problems for a large financial services client.
- Monitored platform health and security data ingestion across multiple environments, ensuring data accuracy and reliability for vulnerability assessments and compliance reporting.
- Supported cloud security platform activities, including configuration and maintenance within Microsoft Azure, integrating with existing asset management systems.
- Assisted with Qualys Vulnerability Management and Policy Compliance (Policy Audit) tasks, including security configuration assessments and scan monitoring.
- Developed and maintained technical documentation, troubleshooting procedures, and operational runbooks for vulnerability management and security compliance platforms.
- Contributed to the implementation of new security capabilities and platform upgrades by performing testing and configuration adjustments.
- Containerized and deployed internal tooling for vulnerability data analysis using **Docker** and deployed on **AWS EC2** instances.

SKILLS

Vulnerability Management – Qualys, Wiz, Security Configuration Compliance, Scanning Infrastructure, Asset Coverage, Policy Compliance, Policy Audit

Cloud Security – Microsoft Azure, Cloud Security Platforms

Operating Systems & Infrastructure – Windows, Linux, Networking, Database, Middleware Server Administration

Scripting & Automation – Python, PowerShell

Core Technologies – REST APIs, Git, Jira, Confluence

Development Practices – Agile/Scrum, Code Reviews, Technical Documentation, Troubleshooting

PROJECTS

Enterprise Vulnerability Data Aggregation and Analysis

- Engineered a Python-based data pipeline to ingest vulnerability scan results from multiple enterprise platforms, including **Qualys** and cloud security tools, consolidating data into a central PostgreSQL database.
- Developed automated scripts to parse and normalize scan data, enriching asset information from an integrated asset management system, reducing manual data reconciliation effort by approximately 40%.
- Created a suite of **Power BI** dashboards to visualize key vulnerability metrics, track remediation progress, and report on compliance status to security operations teams.

Automated Security Compliance Monitoring Service

- Built a **Java Spring Boot** microservice deployed on **AWS Lambda** to periodically check security configurations against defined compliance policies using cloud provider APIs.
- Implemented RESTful APIs for triggering compliance checks and retrieving results, integrating with an internal IT Service Management workflow for automated ticket generation on policy violations.
- Designed and implemented robust logging and error handling mechanisms, ensuring reliable operation and detailed audit trails for all compliance assessments.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
