PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India Sep 2021 – Jan 2025

- Provided technical expertise and product demonstrations to potential customers, translating complex identity and access management concepts into clear value propositions.
- Collaborated with sales teams to define customer use cases and architect solutions utilizing the Auth0 platform, supporting discovery and validation phases.
- Designed and executed outcome-driven Proofs of Concept (POCs) for enterprise clients, showcasing the integration capabilities of Auth0 within their existing technology stacks.
- Developed and maintained a comprehensive understanding of Auth0's product suite, including authentication protocols like **OIDC** and **OAuth**, and their application in modern security architectures.
- Engaged with technical stakeholders, including **developers** and **product managers**, to gather requirements and address inquiries regarding identity federation and user management.
- Contributed to the development of technical documentation and presentation materials, enhancing the sales team's ability to communicate the benefits of Auth0's CIAM solutions.
- Containerized Auth0 platform components and deployed them to a cloud environment using **Docker** and **AWS EC2** for demonstration and POC purposes.

SKILLS

Identity Protocols – SAML, OIDC, OAuth, FIDO, SCIM, LDAP

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Developer Tools – Docker, Git, Jenkins

Programming Languages – Java, Python, SQL

Frameworks/Libraries – Spring Boot, pandas, NumPy, scikit-learn

BI & Data Analytics – Power BI, Tableau, DAX, Power Query

Core Concepts – CIAM, Cybersecurity, API Development, Data Modelling

PROJECTS

Auth0 CIAM Solution Architecture for Enterprise Clients

- Designed and presented end-to-end CIAM solutions for hypothetical enterprise clients, integrating Auth0 with their existing identity providers and application ecosystems.
- Developed detailed technical diagrams and documentation outlining user flows, authentication strategies using **OIDC**, and security configurations for various use cases.
- Simulated customer onboarding scenarios, demonstrating the platform's flexibility in handling **multi-factor authentication** and single sign-on requirements.

Automated Identity Workflow with Python and AWS

- Scripted Python automation to manage user provisioning and de-provisioning workflows, interacting with mock identity provider APIs.
- Developed data processing pipelines using **pandas** to analyze user authentication logs and identify potential security anomalies, reaching a ~78% accuracy in simulated threat detection.
- Deployed a **FastAPI** application on **AWS Lambda** to serve as a mock authentication service, handling ~150 requests per minute during testing.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
