HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • **Stamp 1G — Full-Time Work Eligible**

PROFESSIONAL EXPERIENCE — 3.5 YEARS

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and built backend systems and workflow tooling for the full lifecycle of lawful data access requests, from intake and scoping through authorized retrieval, review, and audit, processing approximately **150 cases per quarter**.
- Developed reliable data pipelines and interfaces across product and data stores using **Python and SQL**, enabling authorized teams to locate and handle records accurately and reproducibly, reducing manual data compilation time by **40%**.
- Implemented **least-privilege access controls**, approval gates, and audit trails for sensitive workflows, ensuring strict adherence to data privacy and security policies.
- Partnered with Legal and Legal Operations teams to translate complex operational requirements into clear technical designs and intuitive operator experiences, improving user satisfaction scores by **15%**.
- Identified and implemented responsible automation opportunities, reducing repetitive manual work in case handling by approximately **20%** while preserving essential human review.
- Owned production systems through rigorous testing, detailed observability setup with **Splunk and Dynatrace**, proactive incident response, and comprehensive documentation, achieving a **98%** reduction in critical alert fatigue for the operations team.
- Contributed to defining the architecture and roadmap for reusable privacy and legal-infrastructure foundations, supporting the evolution of core products and legal obligations.

SKILLS

Backend Development – Java, Spring Boot, Python, Flask, FastAPI, REST APIs, Microservices, SQL, PostgreSQL, MySQL, Oracle

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Linux, Shell Scripting

Data Analytics & BI – Power BI, Tableau, DAX, Power Query, pandas, NumPy, scikit-learn, R/RStudio, Data Warehousing

Workflow & Operations – Jira, Confluence, Splunk, Dynatrace, Incident Response, Change Management, GDPR Compliance

Programming Languages – Python, Java, SQL, R, Shell Scripting

Databases – PostgreSQL, MySQL, Oracle

PROJECTS

Secure Data Access Workflow Automation

- Engineered a **Python-based workflow automation system** to manage the lifecycle of sensitive data access requests, integrating with internal ticketing systems.
- Implemented granular **access control mechanisms** and auditable logging for all data retrieval operations, ensuring compliance with privacy regulations like GDPR.
- Developed an administrative interface using **Flask** that allowed legal operations to track case progress and generate compliance reports, reducing manual reporting effort by **35%**.

Operational Data Pipeline for Legal Compliance

- Built a scalable **ETL pipeline using Python and SQL** to extract, transform, and load data from various enterprise systems into a central data store for legal review.
- Designed and implemented data validation checks and anomaly detection within the pipeline to ensure the accuracy and integrity of data presented for legal cases, catching approximately **90%** of malformed records.
- Created automated alerts for pipeline failures or data quality issues, ensuring timely resolution and maintaining data readiness for critical legal workflows.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India 2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
